Analysis of The Bank's Performance

Economic Conditions Directly Impacting The Company's Performance and Target Market

The global economy in 2025 is projected to grow moderately at 3.2%, slightly lower than the 3.3% recorded in 2024, amid rising uncertainty driven by weakening global demand, trade fragmentation, and escalating geopolitical tensions that have exerted pressure on trade flows and disrupted supply chains. On the other hand, inflationary pressures have begun to ease in line with the normalization of energy and food prices; however, financial market volatility remains elevated, with capital flows tending toward safe-haven assets. Looking ahead, global economic growth is expected to reach approximately 3.1% in 2026, while member countries of the OIC are projected to record higher growth potential of around 4.2%, although the recovery remains uneven, particularly among developing economies.

Amid the global economic slowdown, Indonesia's economy has continued to demonstrate resilience, maintaining relatively stable performance despite ongoing global uncertainties. National economic growth was recorded at 4.87% in the first quarter of 2025, gradually increasing to 5.12% in the third quarter and 5.11% in the fourth quarter of 2025, supported by strengthening household consumption, increased investment, and sustained financial sector stability.

From the perspective of the Sharia banking industry in Indonesia, the sector has demonstrated increasingly strong acceleration, supported by the performance of leading sectors contributing to

pembiayaan yang tetap resilien, serta inovasi keuangan sosial syariah. Selain itu, tingkat permodalan juga tetap kuat dengan Capital Adequacy Ratio (CAR) sebesar 25,07% pada tahun 2025, meningkat dari 24,79% pada tahun 2024, sehingga memperkuat peran perbankan syariah sebagai pilar strategis dalam mendorong pertumbuhan ekonomi yang inklusif, berkelanjutan, dan berdaya tahan melalui sinergi kebijakan yang terintegrasi serta peningkatan literasi dan inklusi keuangan syariah.

Berdasarkan analisis perekonomian dan industri perbankan syariah serta memperhatikan tantangan yang ada, maka Bank BSN menetapkan target pasar khususnya peningkatan DPK dan Pembiayaan. Peningkatan dilakukan dengan mengembangkan produk baru meliputi kegiatan pemberian pembiayaan, penghimpunan DPK, layanan transaksi dana dan layanan transaksi perbankan. Penerbitan produk baru ditujukan untuk mendukung pertumbuhan bisnis dan meningkatkan pendapatan selain untuk memberikan layanan yang lebih baik bagi nasabah.

Kendala lainnya yaitu, *top of mind* masyarakat masih sebatas bank perumahan. Untuk itu Bank memiliki strategi dengan menghadirkan produk *wealth management*, solusi keuangan syariah yang lebih beragam, serta memperkuat *positioning* sebagai mitra keuangan keluarga yang komprehensif.

From a *Human Capital* perspective, the Bank has shown continuous strengthening through the implementation of various learning and development programs aligned with its business strategy. The Bank consistently ensures the fulfillment of employee competency requirements through training, development programs, assignments, as well as structured job rotation and promotion mechanisms. Development programs are focused on four main areas, namely *Financing & Risk*, *Leadership*, *Operational Banking*, and *Sales & Service*, aimed at enhancing technical capabilities, leadership skills, operational excellence, and service quality. Comparison Between Achieved Results and Targets

Amid relatively strong economic conditions, Bank BSN's overall business performance has progressed well. This is reflected in several financial indicators that have successfully met the established targets. Financing increased significantly to IDR 54.87 trillion, achieving 105.98% of the target. Third-Party Funds reached IDR58.73 trillion, equivalent to 100.86% of the target.

Challenges Faced by The Company and Mitigation Measures

In addition to the achievements recorded throughout 2025, Bank BSN recognizes that its operations are not without challenges. One of the key challenges faced by the Bank is the limited retail funding engine. To address this, the Bank has implemented strategies to build a sustainable funding engine, including optimizing retail customer acquisition (B2C), developing payroll services, creating a seamless funding journey, and expanding the customer base through affluent segments, communities, and B2B2C channels. Another challenge lies in the public perception of the Bank, which remains primarily associated with housing financing. To address this, the Bank has adopted strategies to introduce wealth management products, offer more diverse Sharia financial solutions, and strengthen its positioning as a comprehensive financial partner for families.

Hal-Hal Penting yang Diperkirakan Terjadi pada Masa Mendatang dan Prospek Usaha

Dengan memperhatikan dinamika kondisi terkini, pada Januari 2026 *International Monetary Fund* (IMF) memproyeksikan pertumbuhan ekonomi global untuk 2026 menjadi 3,3%, kemudian melambat ke level 3,2% di tahun 2027. Ekonomi Tiongkok pada tahun 2026 juga diperkirakan akan melambat. Sedangkan ekonomi pada negara maju seperti Amerika Serikat diperkirakan akan tumbuh sedikit lebih tinggi dibandingkan tahun 2025.

Pertumbuhan ekonomi nasional tetap tumbuh positif pada 2025 di tengah perlambatan ekonomi global, didorong oleh konsumsi rumah tangga yang masih kuat, investasi yang masuk serta terjaganya kinerja ekspor. Bank Indonesia memperkirakan pertumbuhan ekonomi pada tahun 2026 diprediksi akan tetap kuat dan tumbuh positif dalam kisaran 4,9%-5,7%. Kemudian tingkat inflasi di tahun 2026 diperkirakan akan tetap terjaga pada kisaran target Bank Indonesia yaitu $2,5\% \pm 1\%$ yoy. Untuk mencapai tingkat inflasi tersebut, Pemerintah maupun Bank Indonesia akan melakukan bauran kebijakan fiskal, moneter, dan sektor riil.

Sektor Jasa keuangan khususnya perbankan diprediksi akan tetap terjaga kinerjanya, menguat dibandingkan tahun 2025. Bank Indonesia memperkirakan pada tahun 2026 DPK akan tumbuh pada kisaran 8,0%-10,0% dan penyaluran pembiayaan perbankan akan tumbuh sebesar 8,0%-12,0%. Sedangkan untuk industri syariah di tahun 2026 diproyeksikan sebesar 4,9%-5,7%, pertumbuhan DPK diproyeksikan sebesar 7,5%-8,5% dan pembiayaan diproyeksikan tumbuh 10,0%-11,0%.

Berdasarkan prakiraan kondisi perekonomian global, nasional, serta perkembangan industri perbankan tersebut, terdapat berbagai peluang strategis yang dapat dimanfaatkan oleh Bank BSN untuk memperkuat posisi dan daya saingnya di pasar antara lain:

1. Peluang *cross-sell* di ETB cukup besar
2. Memanfaatkan pertumbuhan Syariah *Wealth*
3. Peluang *leapfrog* dari *legacy stack* saat ini
4. Permintaan meningkat untuk solusi *ethical finance*
5. Evolusi AI yang cepat

Berdasarkan berbagai peluang tersebut, Bank BSN optimis dapat terus meningkatkan kinerjanya dalam jangka panjang.

Key Developments Expected in The Future and Business Prospects

Taking into account current economic dynamics, in January 2026, the International Monetary Fund (IMF) projected global economic growth at 3.3% for 2026, before moderating to 3.2% in 2027. China's economy is also expected to slow in 2026, while advanced economies such as the United States are projected to grow slightly higher compared to 2025.

Indonesia's economy continued to grow positively in 2025 despite the global slowdown, supported by strong household consumption, sustained investment inflows, and stable export performance. Bank Indonesia projects that economic growth in 2026 will remain robust, within the range of 4.9%–5.7%. Meanwhile, inflation in 2026 is expected to remain within Bank Indonesia's target range of $2.5\% \pm 1\%$ yoy. To achieve this target, the Government and Bank Indonesia will implement a mix of fiscal, monetary, and real sector policies.

The financial services sector, particularly banking, is expected to maintain solid performance and strengthen compared to 2025. Bank Indonesia projects that in 2026, Third-Party Funds (TPF) will grow within the range of 8.0%–10.0%, while bank lending is expected to grow by 8.0%–12.0%. Meanwhile, the Islamic banking industry in 2026 is projected to grow in line with national economic growth at 4.9%–5.7%, with TPF growth projected at 7.5%–8.5% and financing growth at 10.0%–11.0%.

Based on projections of global and national economic conditions, as well as developments in the banking industry, several strategic opportunities can be leveraged by Bank BSN to strengthen its market position and competitiveness, including:

1. Significant cross-selling opportunities in ETB
2. Leveraging the growth of Shariah *Wealth*
3. Leapfrog opportunities from the current legacy stack
4. Increasing demand for ethical finance solutions
5. Rapid AI evolution

Based on these opportunities, Bank BSN remains optimistic about its ability to continuously improve its performance over the long term.

Melalui mekanisme tersebut, Dewan Komisaris berperan dalam menjaga agar strategi yang dijalankan Direksi tetap efektif, adaptif, dan mampu mendukung pencapaian kinerja Bank secara berkelanjutan.

Kondisi Perekonomian yang Secara Langsung Berdampak Terhadap Kinerja Bank

Perekonomian global pada tahun 2025 diperkirakan tumbuh terbatas di tengah meningkatnya ketidakpastian akibat melemahnya permintaan, fragmentasi perdagangan, serta eskalasi konflik geopolitik yang turut menekan perdagangan internasional dan mengganggu rantai pasok global. Berdasarkan laporan dari International Monetary Fund (IMF), pertumbuhan ekonomi dunia diprakirakan melambat dari 3,3% pada tahun 2024 menjadi 3,2% pada tahun 2025. Meskipun tekanan inflasi mulai mereda seiring normalisasi harga komoditas, volatilitas pasar keuangan masih tinggi dan prospek pertumbuhan ke depan diproyeksikan tetap moderat dengan pemulihan yang belum merata, khususnya di negara berkembang.

Perekonomian Indonesia tetap memperlihatkan daya tahan yang baik di tengah berlanjutnya ketidakpastian global. Kinerja ekonomi nasional pada Triwulan I 2025 tercatat sebesar 4,87%, kemudian mengalami peningkatan secara bertahap hingga mencapai 5,12% pada Triwulan III dan tetap kuat di level 5,11% pada Triwulan IV 2025. Penguatan ini didukung oleh membaiknya konsumsi rumah tangga, meningkatnya realisasi investasi, serta terjaganya stabilitas sektor keuangan secara keseluruhan.

Dari sisi industri perbankan syariah, terus menunjukkan penguatan kinerja yang tercermin dari pertumbuhan pembiayaan dan penghimpunan dana yang solid, serta didukung permodalan yang tetap kuat. Pada tahun 2025, pembiayaan mencapai Rp685 triliun atau tumbuh 9,66% dari Rp625 triliun pada 2024, sementara Dana Pihak Ketiga meningkat 10,19% menjadi Rp812 triliun dari Rp737 triliun, dengan *Capital Adequacy Ratio* (CAR) naik menjadi 25,07% dari 24,79%, sehingga memperkuat peran perbankan syariah dalam mendorong pertumbuhan ekonomi yang inklusif dan berkelanjutan.

Kinerja Bank

Dewan Komisaris memandang bahwa kinerja Bank BSN sepanjang tahun 2025 menunjukkan pertumbuhan yang sangat kuat dan ekspansif, terutama pasca pelaksanaan Penerimaan Pemisahan UUS BTN. Hal ini tercermin dari peningkatan signifikan pada berbagai indikator utama, antara lain penghimpunan dana yang mencapai Rp58,73 triliun atau tumbuh 42,07% dibandingkan tahun sebelumnya, serta penyaluran pembiayaan yang meningkat pesat, khususnya pada segmen komersial dan SME yang mencapai Rp3,52 triliun atau tumbuh 155,76%. Selain itu, pembiayaan

implementation takes into account aspects of risk management, compliance, and good corporate governance. Through these mechanisms, the Board of Commissioners plays a role in ensuring that the strategies implemented by the Board of Directors remain effective, adaptive, and capable of supporting the Bank's sustainable performance.

Economic Conditions That Directly Impact Bank Performance

The global economy was projected to experience limited growth in 2025 amidst increasing uncertainty due to weakening demand, trade fragmentation, and escalating geopolitical conflicts, which contributed to pressure on international trade and disrupting global supply chains. According to a report from the International Monetary Fund (IMF), global economic growth was projected to slow from 3.3% in 2024 to 3.2% in 2025. Although inflationary pressures began to ease as commodity prices normalized, financial market volatility remained high, and future growth prospects were projected to remain moderate, with an uneven recovery, particularly in developing countries.

The Indonesian economy continued to demonstrate strong resilience amidst ongoing global uncertainty. National economic performance in the first quarter of 2025 was recorded at 4.87%, then gradually increased to 5.12% in the third quarter and remained strong at 5.11% in the fourth quarter of 2025. This strengthening was supported by improving household consumption, increased investment realization, and maintained overall financial sector stability.

The Islamic banking industry continued to demonstrate strong performance, reflected in solid financing and fundraising growth, supported by robust capital. Throughout 2025, financing was projected to reach IDR685 trillion, a 9.66% increase from IDR625 trillion in 2024. Third-party funds increased 10.19% to IDR812 trillion from IDR737 trillion. The Capital Adequacy Ratio (CAR) increased to 25.07% from 24.79%, strengthening the role of Islamic banking in driving inclusive and sustainable economic growth.

Bank Performance

The Board of Commissioners views that BSN Bank's performance throughout 2025 demonstrated very strong and expansive growth, particularly following the acceptance of the spin-off of BTN's Sharia Business Unit (UUS). This was reflected in significant increases in various key indicators, including fund collection which reached IDR58.73 trillion, a 42.07% growth compared to the previous year, as well as rapidly increasing financing disbursement, particularly in the commercial and SME segments, which reached IDR3.52 trillion, a 155.76% growth. Furthermore,

non-KPR meningkat 58,66% menjadi Rp312,09 miliar, sementara pembiayaan KPR iB sebagai bisnis inti mencatat pertumbuhan yang sangat kuat sebesar 45,19% menjadi Rp13,77 triliun, mencerminkan tingginya kepercayaan masyarakat terhadap pembiayaan perumahan syariah.

Dari sisi keuangan, pertumbuhan juga terlihat sangat signifikan dengan total aset mencapai Rp73,07 triliun atau meningkat 2.104,55%, serta ekuitas sebesar Rp6,50 triliun atau tumbuh 496,27%, yang terutama didorong oleh pengalihan bisnis pasca *spin-off*. Kinerja pendapatan juga menunjukkan peningkatan substansial, dengan pendapatan pengelolaan dana sebagai mudharib mencapai Rp2,73 triliun atau tumbuh 1.039,73%, serta laba tahun berjalan sebesar Rp83,64 miliar atau meningkat 313,85% dibandingkan tahun sebelumnya. Dewan Komisaris menilai bahwa pencapaian ini mencerminkan keberhasilan Direksi dalam mengelola transformasi bisnis secara efektif, memperkuat fundamental Bank, serta menjaga momentum pertumbuhan yang berkelanjutan.

Pandangan atas Prospek Usaha yang Disusun Direksi

Dengan mempertimbangkan dinamika global, IMF memproyeksikan pertumbuhan ekonomi dunia sebesar 3,3% pada 2026 dan sedikit melambat menjadi 3,2% pada 2027, dengan ekonomi negara berkembang termasuk Indonesia cenderung meningkat, sementara Tiongkok melambat dan negara maju seperti Amerika Serikat tumbuh lebih baik. Dari sisi perekonomian nasional, perekonomian Indonesia diperkirakan tetap kuat dengan pertumbuhan 4,9%–5,7% dan inflasi terjaga pada kisaran 2,5%±1% (yoy). Sektor perbankan juga diproyeksikan tumbuh positif, dengan Dana Pihak Ketiga (DPK) meningkat 8,0%–10,0% dan pembiayaan 8,0%–12,0%, sementara industri perbankan syariah diperkirakan tumbuh 4,9%–5,7%, dengan DPK sebesar 7,5%–8,5% dan pembiayaan meningkat 10,0%–11,0%.

Berdasarkan prediksi kondisi perekonomian dan industri perbankan, Dewan Komisaris berpendapat bahwa prospek usaha yang telah disusun oleh Direksi sudah tepat. Dewan Komisaris berkeyakinan bahwa Bank akan dapat memanfaatkan peluang yang ada di antaranya adalah optimalisasi potensi *cross-sell* pada nasabah eksisting, pemanfaatan pertumbuhan bisnis syariah *wealth*, serta peluang melakukan lompatan transformasi digital dari kondisi *legacy system* yang ada saat ini. Selain itu, meningkatnya kebutuhan terhadap solusi keuangan berbasis prinsip *ethical finance* serta pesatnya perkembangan teknologi, termasuk kecerdasan buatan (AI), juga menjadi peluang strategis yang dapat dimanfaatkan untuk mendorong pertumbuhan bisnis Bank ke depan.

non-mortgage financing increased 58.66% to IDR312.09 billion, while iB mortgage financing, as the core business, recorded very strong growth of 45.19% to IDR13.77 trillion, reflecting the high public trust in sharia housing financing.

From the financial side, growth also looked very significant with total assets which reached IDR73.07 trillion or an increase of 2,104.55%, and equity of IDR6.50 trillion or a growth of 496.27%, which was mainly driven by the transfer of business after the spin-off. Revenue performance also showed a substantial increase, with fund management income as mudharib reached IDR2.73 trillion or grew 1,039.73%, and profit for the year amounted to IDR83.64 billion or an increase of 313.85% compared to the previous year. The Board of Commissioners assesses that this achievement reflects the success of the Board of Directors in managing business transformation effectively, strengthening the Bank's fundamentals, and maintaining sustainable growth momentum.

Outlook on Business Prospects Prepared by The Board of Directors

Taking into account global dynamics, the IMF projects global economic growth of 3.3% in 2026 and a slight slowdown to 3.2% in 2027, with emerging economies including Indonesia tending to accelerate, while China slows and developed economies such as the United States grow better. From a national economic perspective, Indonesia's economy is expected to remain strong with growth of 4.9%–5.7% and inflation maintained at around 2.5%±1% (yoy). The banking sector is also projected to grow positively, with Third-Party Funds (TPF) increasing by 8.0%–10.0% and credit by 8.0%–12.0%, while the Islamic banking industry is expected to grow by 4.9%–5.7%, with TPF at 7.5%–8.5% and financing increasing by 10.0%–11.0%.

Based on the predicted economic and banking industry conditions, the Board of Commissioners believes that the business prospects prepared by the Board of Directors are appropriate. The Board of Commissioners is confident that the Bank will be able to capitalize on existing opportunities, including optimizing cross-selling potential for existing customers, leveraging the growth of the Sharia wealth business, and leveraging the opportunity to make a digital transformation leap from the current legacy system. Furthermore, the increasing demand for financial solutions based on ethical finance principles and the rapid development of technology, including artificial intelligence (AI), also present strategic opportunities that can be utilized to drive the Bank's future business growth.

Pandangan Atas Penerapan Tata Kelola Bank

Dewan Komisaris memandang bahwa penerapan *corporate governance* di Bank BSN telah berjalan dengan baik dan terus diperkuat secara berkelanjutan. Penilaian tersebut didasarkan pada efektivitas sistem pengendalian internal, penerapan manajemen risiko yang memadai, serta berfungsinya mekanisme *whistleblowing system*. Selain itu, Bank juga telah mulai mengintegrasikan aspek tata kelola keberlanjutan dalam aktivitas bisnisnya. Dewan Komisaris menilai bahwa seluruh aspek tersebut menjadi fondasi penting dalam menjaga integritas, meningkatkan kepercayaan pemangku kepentingan, serta mendukung pertumbuhan Bank yang sehat dan berkelanjutan.

Secara umum, hasil evaluasi menunjukkan bahwa sistem pengendalian internal di Bank telah berjalan cukup memadai dalam mendukung pencapaian tujuan Bank, menjaga kepatuhan, dan mengendalikan risiko, meskipun masih diperlukan penyempurnaan berkelanjutan untuk meningkatkan efektivitas dan konsistensi penerapannya.

Hal ini tercermin dari struktur pengendalian yang telah berjalan, pemisahan fungsi yang relatif memadai, serta pelaksanaan pengawasan internal yang dilakukan secara bertahap.

Bank juga mengelola berbagai jenis risiko, seperti risiko kredit, pasar, likuiditas, operasional,

Outlook on The Implementation of Corporate Governance

The Board of Commissioners believes that the implementation of corporate governance at Bank BSN has been running well and continues to be strengthened on an ongoing basis. This assessment is based on the effectiveness of the internal control system, the implementation of adequate risk management, and the functioning of the whistleblowing system. Furthermore, the Bank has begun integrating aspects of sustainable governance into its business activities. The Board of Commissioners believes that all of these aspects are essential foundations for maintaining integrity, enhancing stakeholder trust, and supporting the Bank's sound and sustainable growth.

Internal Control System

The Bank's internal control system has been implemented comprehensively and integrated across all levels of the organization, involving the Board of Directors and all employees in ensuring effective risk control. The internal control system is implemented through the establishment of policies and procedures covering authority, authorization, verification, reconciliation, separation of functions (the four eyes principle), and the security of assets and information systems, including general and application controls to ensure accuracy and compliance with sharia principles. In addition, controls were strengthened through management and operational reviews, regulatory compliance functions, and the implementation of Internal Control over Financial Reporting (ICOFR) to ensure the reliability of financial reporting. Overall, the evaluation results indicate that the Bank's internal control system has been operating adequately in supporting the achievement of its objectives, maintaining compliance, and controlling risk. However, ongoing improvements are needed to increase the effectiveness and consistency of its implementation.

The Board of Directors and Board of Commissioners assess that Bank BSN's internal control system has been effective and adequate throughout 2025. This is reflected in the existing control structure, relatively adequate separation of functions, and the gradual implementation of internal supervision.

Risk Management

The implementation of risk management in the Bank has been conducted in a comprehensive and integrated manner with reference to four main pillars, namely active supervision of the Board of Directors, Board of Commissioners, and Sharia Supervisory Board, the adequacy of policies and procedures and the determination of risk limits, the effectiveness of the process of identification, measurement, monitoring, and risk control supported by the risk management information system, and strengthening the internal control system. The Bank also

hukum, strategik, kepatuhan, reputasi, imbal hasil, dan investasi, melalui kebijakan dan mitigasi yang terukur sesuai prinsip kehati-hatian dan kepatuhan terhadap prinsip syariah. Didukung oleh Satuan Kerja Manajemen Risiko yang independen serta kebijakan yang terus disempurnakan, hasil evaluasi menunjukkan bahwa penerapan manajemen risiko di Bank telah berjalan secara memadai dalam menjaga stabilitas kinerja dan mendukung pertumbuhan usaha yang berkelanjutan.

Direksi dan Dewan Komisaris menilai bahwa sistem manajemen risiko Bank BSN telah berjalan efektif dan memadai. Hal ini tercermin dari berfungsinya secara optimal unit pengendalian internal seperti audit internal, manajemen risiko, kepatuhan, serta kontrol finansial dan operasional. Penerapan manajemen risiko dilakukan berdasarkan prinsip tata kelola perusahaan yang baik dengan keterlibatan aktif seluruh organ perusahaan.

Dewan Komisaris melalui Komite Pemantau Risiko dan Direksi melalui Komite Manajemen Risiko secara berkala memastikan kecukupan penerapan manajemen risiko sesuai dengan karakteristik, kompleksitas, dan profil risiko Bank BSN. Berdasarkan hasil evaluasi tahun 2025, sistem manajemen risiko dinilai telah dilaksanakan secara memadai. Kecukupan tersebut didukung oleh peran aktif Komite Pemantau Risiko, dan Komite Manajemen Risiko dalam melakukan evaluasi kebijakan, pemantauan profil risiko, serta pemberian rekomendasi mitigasi risiko, termasuk pada produk dan aktivitas baru.

Whistleblowing System

Bank BSN telah menerapkan *Whistleblowing System* (WBS) sebagai bagian dari penguatan tata kelola dan strategi *anti fraud*, dengan mekanisme pelaporan yang dikelola secara independen serta didukung prosedur penanganan yang jelas dan berlapis sesuai dengan pihak terlapor. Sistem ini memungkinkan pelaporan dilakukan secara aman dan rahasia, disertai jaminan perlindungan bagi pelapor dari berbagai bentuk risiko, sehingga mendorong budaya keterbukaan dan integritas di lingkungan Bank. Pengelolaan WBS juga melibatkan pihak independen untuk menjaga objektivitas dan kredibilitas proses.

Dalam hal pengawasan, Dewan Komisaris berperan aktif terutama ketika laporan melibatkan Direksi atau pihak di bawah pengawasannya, dengan memastikan setiap pengaduan ditindaklanjuti secara tepat melalui audit khusus dan sesuai ketentuan yang berlaku. Sepanjang tahun 2025, tidak terdapat pengaduan yang masuk melalui mekanisme WBS, yang mencerminkan efektivitas pengendalian internal serta meningkatnya kepatuhan dan budaya etika di lingkungan Bank. Dewan Komisaris berpandangan bahwa penerapan WBS di Bank telah berjalan dengan baik

manages various types of risks, such as credit, market, liquidity, operational, legal, strategic, compliance, reputational, return, and investment risks, through measurable policies and mitigation measures in line with prudential principles and compliance with Sharia principles. Supported by an independent Risk Management Unit and continuously refined policies, evaluation results indicate that the Bank's risk management implementation has been adequate in maintaining performance stability and supporting sustainable business growth.

The Board of Directors and Board of Commissioners assess that Bank BSN's risk management system has been effective and adequate. This is reflected in the optimal functioning of internal control units such as internal audit, risk management, compliance, and financial and operational controls. Risk management is implemented based on the principles of good corporate governance with the active involvement of all company organs.

The Board of Commissioners, through the Risk Monitoring Committee, and the Board of Directors, through the Risk Management Committee, periodically ensure that the adequacy of risk management implementation is in line with the characteristics, complexity, and risk profile of Bank BSN. Based on the 2025 evaluation, the risk management system was deemed adequately implemented. This adequacy was supported by the active role of the Risk Monitoring Committee and the Risk Management Committee in evaluating policies, monitoring risk profiles, and providing risk mitigation recommendations, including for new products and activities.

Whistleblowing System

Bank BSN has implemented a Whistleblowing System (WBS) as part of strengthening corporate governance and its anti-fraud strategy, with a reporting mechanism that is managed independently and supported by clear and tiered handling procedures based on the reported party. This system enables reporting to be conducted securely and confidentially, accompanied by safeguards to protect whistleblowers from various forms of risk, thereby fostering a culture of transparency and integrity within the Bank. The management of the WBS also involves independent parties to ensure the objectivity and credibility of the process.

From a supervisory perspective, the Board of Commissioners plays an active role, particularly when reports involve the Board of Directors or parties under its oversight, by ensuring that each complaint is properly followed up through special audits in accordance with prevailing regulations. Throughout 2025, there were no complaints submitted through the WBS mechanism, reflecting the effectiveness of internal controls as well as the strengthening of compliance and ethical culture within the Bank. The Board of Commissioners is of the view that the implementation of the WBS within the Bank has been effective.

Tata Kelola Keberlanjutan

Bank BSN menerapkan tata kelola keberlanjutan sebagai bagian integral dari strategi bisnis dengan mengedepankan prinsip kehati-hatian, tanggung jawab sosial, dan kepatuhan terhadap prinsip syariah. Penerapan ini diwujudkan melalui integrasi aspek lingkungan, sosial, dan tata kelola (ESG) dalam proses pengambilan keputusan, pengelolaan risiko, serta pengembangan produk dan layanan. Bank juga memastikan bahwa kegiatan operasional dan pembiayaan yang disalurkan memberikan dampak positif bagi masyarakat, termasuk mendukung pembiayaan sektor perumahan yang inklusif dan berkelanjutan. Selain itu, penguatan tata kelola keberlanjutan dilakukan melalui penyusunan kebijakan internal, peningkatan transparansi pelaporan, serta pengawasan aktif oleh Direksi dan Dewan Komisaris guna memastikan keselarasan antara kinerja keuangan dan tanggung jawab keberlanjutan dalam jangka panjang.

Penilaian Kinerja Komite-Komite di Bawah Dewan Komisaris

Dewan Komisaris secara rutin melakukan pengawasan dan evaluasi menyeluruh terhadap kinerja Komite Audit, Komite Pemantau Risiko, serta Komite Nominasi dan Remunerasi. Evaluasi dilakukan setidaknya sekali dalam setahun dengan tujuan memastikan efektivitas pengawasan dan tata kelola yang baik di setiap komite. Hasil evaluasi menjadi landasan untuk memastikan komite-komite tersebut beroperasi sesuai dengan tujuan strategis Bank, sambil memperkuat kontribusi setiap komite terhadap pencapaian target Bank dan pengelolaan risiko yang lebih baik.

The Bank also ensures that its operational activities and financing distribution generate positive impacts for society, including supporting inclusive and sustainable housing financing. Analisis dan Pembahasan Manajemen atas Kinerja Bank

**Management Discussion and
Analysis on Bank Performance**

Tinjauan Perekonomian

Economic Review

Analisis Perekonomian Global

Perekonomian global pada tahun 2025 masih tumbuh terbatas di tengah meningkatnya ketidakpastian global. Berdasarkan laporan dari International Monetary Fund (IMF), pertumbuhan ekonomi dunia diprakirakan melambat dari 3,3% pada tahun 2024 menjadi 3,2% pada tahun 2025. Perlambatan tersebut dipengaruhi oleh melemahnya permintaan global serta meningkatnya fragmentasi perdagangan internasional akibat kebijakan tarif sepihak dan kebijakan balasan dari negara mitra dagang. Selain itu, eskalasi konflik geopolitik turut meningkatkan ketidakpastian global yang tercermin pada kenaikan indikator ketidakpastian seperti *World Uncertainty Index (WUI)* dan *Geopolitical Risk Index (GPR)*, sehingga menekan perdagangan internasional dan memperburuk gangguan rantai pasok global. Sejalan dengan itu, laporan dari World Bank menunjukkan bahwa pemulihan ekonomi global masih berlangsung tidak merata, terutama pada negara berkembang yang lebih rentan terhadap guncangan eksternal.

Di sisi lain, tekanan inflasi global secara umum menunjukkan tren melandai sepanjang tahun 2025 seiring normalisasi harga komoditas energi dan pangan, meskipun volatilitas masih relatif tinggi akibat faktor cuaca dan geopolitik. Ketidakpastian global juga memengaruhi stabilitas pasar keuangan dunia yang ditandai meningkatnya volatilitas dan pergeseran aliran modal ke aset *safe haven*, seperti obligasi pemerintah Amerika Serikat dan emas. Ke depan, prospek ekonomi global diperkirakan tetap tumbuh moderat, dengan International Monetary Fund memproyeksikan pertumbuhan ekonomi global sebesar 3,1% pada tahun 2026, sementara pertumbuhan ekonomi negara-negara Organisasi Kerja Sama Islam (OKI) diperkirakan mencapai sekitar 4,2%, yang diharapkan dapat mendorong penguatan aktivitas ekonomi global, termasuk perkembangan ekonomi dan keuangan syariah.

Analisis Perekonomian Nasional

Perekonomian nasional tetap menunjukkan ketahanan dan prospek positif di tengah perlambatan ekonomi dunia seiring ketidakpastian global yang berlanjut akibat eskalasi risiko geopolitik dan risiko kebijakan tarif sepihak Amerika Serikat, meski diimbangi oleh meredanya tekanan inflasi komoditas pangan dan energi. Secara global, pertumbuhan ekonomi nasional yang relatif baik masih dicatatkan, didukung nilai transaksi yang meningkat dan industri keuangan yang tetap solid.

Global Economic Analysis

The global economy in 2025 continued to grow at a limited pace amid heightened global uncertainty. Based on a report from the International Monetary Fund (IMF), global economic growth is projected to slow from 3.3% in 2024 to 3.2% in 2025. This deceleration is driven by weakening global demand and increasing fragmentation in international trade resulting from unilateral tariff policies and retaliatory measures by trading partners. In addition, the escalation of geopolitical conflicts has further intensified global uncertainty, as reflected in rising indicators such as the World Uncertainty Index (WUI) and the Geopolitical Risk Index (GPR), thereby exerting pressure on international trade and exacerbating disruptions in global supply chains. In line with this, the World Bank reports that the global economic recovery remains uneven, particularly among developing countries that are more vulnerable to external shocks.

On the other hand, global inflationary pressures generally showed a moderating trend throughout 2025 in line with the normalization of energy and food commodity prices, although volatility remained relatively high due to weather and geopolitical factors. Global uncertainty has also affected the stability of international financial markets, as indicated by increased volatility and shifts in capital flows toward safe-haven assets, such as United States government bonds and gold. Looking ahead, the global economic outlook is expected to remain moderately growing, with the International Monetary Fund projecting global growth of 3.1% in 2026, while economic growth in member countries of the Organization of Islamic Cooperation (OIC) is projected to reach approximately 4.2%, which is expected to support the strengthening of global economic activity, including the development of the Islamic economy and finance sector.

National Economic Analysis

The national economy continued to demonstrate resilience and positive prospects amid the global economic slowdown, alongside persistent global uncertainty driven by escalating geopolitical risks and unilateral tariff policy risks from the United States, although partly offset by easing inflationary pressures on food and energy commodities. At the global level, Indonesia maintained relatively strong economic growth, supported by increasing transaction values and a resilient financial industry.

Kinerja ekonomi Indonesia memasuki tahun 2025 pada Triwulan I 2025 menunjukkan performa yang stabil meski cenderung melambat. Pertumbuhan ekonomi tercatat hanya 4,87%. Memasuki Triwulan II 2025, pertumbuhan ekonomi mulai menunjukkan penguatan yang moderat. Memasuki Triwulan III 2025, pertumbuhan ekonomi menjadi momentum pemulihan yang semakin menguat. Pertumbuhan ekonomi tercatat sebesar 5,12%, lebih tinggi dibandingkan periode yang sama pada tahun sebelumnya. Selanjutnya, pada Triwulan IV 2025, pertumbuhan ekonomi nasional menunjukkan penguatan yang semakin solid dengan pertumbuhan sebesar 5,11%. Peningkatan ini terutama didorong oleh menguatnya konsumsi rumah tangga yang didukung berbagai stimulus fiskal pemerintah, meningkatnya aktivitas investasi, serta tetap terjaganya stabilitas sektor keuangan.

Indonesia's economic performance entering 2025 showed stable yet moderating conditions in the first quarter of 2025, with economic growth recorded at 4.87%. In the second quarter of 2025, economic growth began to show moderate improvement. By the third quarter of 2025, economic growth marked a stronger recovery momentum, reaching 5.12%, higher than the corresponding period in the previous year. Furthermore, in the fourth quarter of 2025, national economic growth strengthened further to 5.11%. This improvement was primarily driven by stronger household consumption supported by various government fiscal stimulus measures, increased investment activities, and the continued stability of the financial sector.

Analisis Industri Perbankan

Industri Perbankan Nasional

Di tengah sentimen perlambatan ekonomi global, kinerja perbankan masih cukup baik sebagaimana tercermin dari fungsi intermediasi yang terjaga dan kondisi permodalan bank yang relatif stabil serta cukup solid sehingga menunjukkan kemampuan bank yang memadai dalam menyerap risiko, beberapa risiko diperkirakan akan mengiringi perbankan global dan juga perbankan Indonesia. Risiko yang dimaksud di antaranya risiko suku bunga acuan tinggi, risiko ketegangan geopolitik, risiko lonjakan harga minyak, risiko krisis biaya hidup, dan risiko fragmentasi atau divergensi ekonomi dunia. Dalam menyusun prioritas dan arah kebijakan otoritas fokus pada 3 (tiga) kebijakan utama, yaitu (1) penguatan sektor jasa keuangan dalam kerangka pengaturan, pengawasan, dan perizinan yang lebih terintegrasi, (2) peningkatan daya saing sektor jasa keuangan dan pendalaman pasar keuangan dalam rangka mendorong pertumbuhan ekonomi nasional yang inklusif dan berkelanjutan, dan (3) meningkatkan kepercayaan Masyarakat dan investor terhadap sektor jasa keuangan.

Analisis Posisi Bank dalam Industri Perbankan

Hingga Desember 2025, Bank BSN tetap kokoh menjadi Bank Syariah terbesar ke-2 (dua) dari sisi aset, dengan total aset mencapai Rp73 triliun. Pencapaian ini didukung juga oleh kenaikan di sisi pembiayaan yang mencapai Rp55 triliun serta dana pihak ketiga yang mencapai Rp32 triliun. Di tahun 2025, persaingan terjadi di seluruh lini bisnis Bank BSN. Kondisi makroekonomi yang menantang, serta industri perbankan yang masih mengalami likuiditas yang ketat, menyebabkan persaingan untuk mendapatkan pendanaan, khususnya pendanaan ritel yang menawarkan biaya pendanaan yang lebih murah menjadi semakin intens. Perseroan bersaing dengan bank-bank lain terutama dalam hal ekstensi dan kenyamanan saluran distribusi, rentang produk, harga, kecepatan pelayanan kepada nasabah dan pencadangan untuk jasa teknologi.

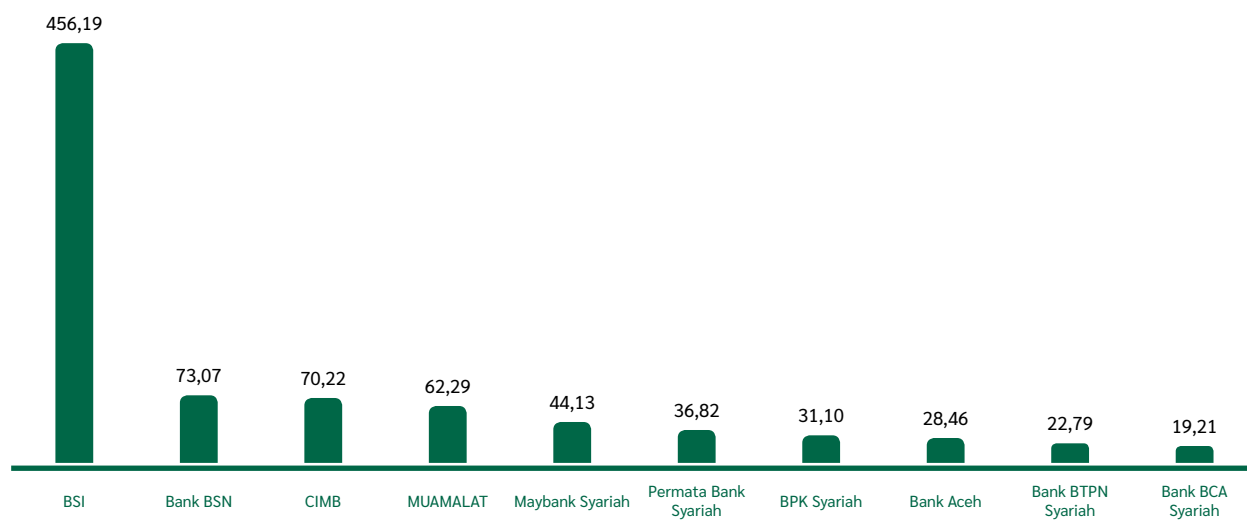

Analysis of the Bank's Position in the Banking Industry

As of December 2025, Bank BSN remained firmly positioned as the 2nd (second) largest sharia bank in terms of total assets, with total assets reaching IDR73 trillion. This achievement was also supported by growth in financing, which reached IDR55 trillion, as well as Third Party Funds amounting to IDR32 trillion. In 2025, competition intensified across all of Bank BSN business lines. Challenging macroeconomic conditions, coupled with tight liquidity in the banking industry, led to intensified competition in funding acquisition, particularly in retail funding, which offers relatively lower cost of funds. The Company competes with other banks primarily in terms of the expansion and convenience of distribution channels, product range, pricing, speed of customer service, and provisioning for technology-related services.

Bank BSN kemungkinan akan tetap menghadapi persaingan dari sejumlah lembaga keuangan yang menawarkan produk dan jasa perbankan yang lebih luas atau pinjaman dengan *limit* yang lebih besar atau memiliki sumber daya finansial dan lainnya yang lebih besar dari pada Bank BSN. Banyak lembaga keuangan akan bersaing untuk mendapat target nasabah yang sama dengan target Perseroan, dan banyak institusi yang memiliki akses kepada pemerintah atau grup bisnis dengan sumber finansial yang lebih besar. Beberapa kompetitor Bank BSN telah, dan diprediksi akan, membentuk aliansi strategis dengan beberapa bank asing dengan sumber daya manajemen dan finansial yang secara signifikan lebih besar.

Bank BSN may continue to face competition from various financial institutions offering a broader range of banking products and services, or loans with larger limits, as well as those possessing greater financial and other resources than Bank BSN. Many financial institutions will compete for the same target customer segments as the Company, with several institutions having stronger access to government entities or business groups with larger financial resources. Some of Bank BSN competitors have established, and are expected to continue forming, strategic alliances with foreign banks that possess significantly greater managerial and financial resources.

- Pembiayaan Konstruksi/Yasa Griya masih yang paling besar diantara semua produk. Nilai pembiayaan pada tahun 2025 yaitu sebesar Rp2,05 triliun atau 58,11%, ini menunjukkan bahwa pembiayaan Konstruksi/Yasa Griya masih menjadi kontributor terbesar dalam hal ini sektor perumahan, meskipun porsi mulai bergeser ke arah Pembiayaan Modal Kerja dan Pembiayaan Investasi.

The increase in total financing was primarily supported by growth in Construction/Yasa Griya Financing, Working Capital Financing, and Investment Financing.

- Construction/Yasa Griya Financing remained the largest among all products. In 2025, financing amounted to IDR2.05 trillion or 58.11%, indicating that Construction/Yasa Griya Financing continued to be the main contributor, particularly in the housing sector, although its proportion has gradually shifted toward Working Capital Financing and Investment Financing.

Total Pembiayaan Non KPR	312.092	196.707	115.385	58,66%	Total Non-Mortgage Financing

Adapun rincian per jenis pembiayaan adalah sebagai berikut:

1. Pembiayaan Multimanfaat

Produk ini menjadi kontributor utama pertumbuhan dengan realisasi sebesar Rp282,18 miliar pada tahun 2025, meningkat dari Rp184,37 miliar pada tahun 2024. Tercatat pertumbuhan sebesar Rp97,80 miliar atau 53,05%. Hal ini menunjukkan tingginya minat dan kebutuhan nasabah terhadap produk pembiayaan multiguna, serta efektivitas strategi pemasaran yang dilakukan.

2. Pembiayaan Cicil Emas

Pada tahun 2025, pembiayaan ini mencatatkan realisasi sebesar Rp22,04 miliar yang sebelumnya tidak ada pada tahun 2024. Hal ini mengindikasikan bahwa produk ini merupakan sumber pertumbuhan baru (*new growth engine*) yang potensial dan mulai diminati oleh nasabah.

3. Pembiayaan Bangun Rumah

Realisasi pembiayaan mengalami penurunan dari Rp11,44 miliar pada tahun 2024 menjadi Rp7,59 miliar pada tahun 2025 yang mengalami penurunan sebesar Rp3,84 miliar atau 33,61%. Penurunan ini dapat mengindikasikan adanya perlambatan permintaan, perubahan preferensi nasabah, atau adanya faktor eksternal seperti kondisi ekonomi dan sektor properti.

4. Pembiayaan Kendaraan Bermotor

Produk ini juga mengalami penurunan signifikan dari Rp897 miliar pada tahun 2024 menjadi Rp284 miliar pada tahun 2025, atau turun sebesar Rp613 miliar atau 68,35%. Penurunan ini perlu menjadi perhatian, mengingat dapat disebabkan oleh menurunnya daya beli masyarakat, kompetisi yang ketat, atau kurang optimalnya strategi pemasaran.

Non-Mortgage Financing (PSB)

Overall, total Non-Mortgage Financing in 2025 was recorded at IDR312.09 billion, representing a significant increase compared to IDR196.71 billion in 2024, reflecting a growth of IDR115.39 billion or 58.66%. This increase indicates very positive performance and a relatively aggressive expansion in the Non-Mortgage Financing segment.

The details by financing type are as follows:

1. Multi-Purpose Financing

This product remained the main contributor to growth, with realization amounting to IDR282.18 billion in 2025, increasing from IDR184.37 billion in 2024. This represents a growth of IDR97.80 billion or 53.05%, reflecting strong customer demand for multi-purpose financing products as well as the effectiveness of the Bank's marketing strategy.

2. Gold Installment Financing

In 2025, this financing recorded a realization of IDR22.04 billion, whereas no realization was recorded in 2024. This indicates that the product serves as a potential new growth engine and has begun to gain traction among customers.

3. Home Construction Financing

Financing realization declined from IDR11.44 billion in 2024 to IDR7.59 billion in 2025, representing a decrease of IDR3.84 billion or 33.61%. This decline may indicate a slowdown in demand, shifts in customer preferences, or external factors such as economic conditions and developments in the property sector.

4. Motor Vehicle Financing

This product also recorded a significant decline, from IDR897 billion in 2024 to IDR284 billion in 2025, representing a decrease of IDR613 billion or 68.35%. This decline requires attention, as it may be driven by reduced purchasing power, intense competition, or suboptimal marketing strategies.

Pertumbuhan pembiayaan Non KPR tahun 2025 didorong secara dominan oleh peningkatan pada produk Multimanfaat dan munculnya produk Cicil Emas sebagai produk baru yang potensial. Namun demikian, terdapat penurunan pada segmen Bangun Rumah dan Kendaraan Bermotor yang perlu menjadi fokus evaluasi ke depan. Diperlukan strategi yang lebih terarah untuk mempertahankan dan mengoptimalkan pertumbuhan pada produk unggulan (Multimanfaat dan Cicil Emas) serta melakukan revitalisasi atau penyesuaian strategi pada produk yang mengalami penurunan. Dengan langkah strategis yang tepat, diharapkan kinerja pembiayaan Non KPR dapat terus tumbuh secara berkelanjutan di periode mendatang.

Pembiayaan KPR Subsidi dan Non Subsidi (MRF)

Secara keseluruhan, total pembiayaan KPR iB menunjukkan tren positif yang sangat kuat. Total pembiayaan meningkat dari 9.480.929 pada tahun 2024 menjadi Rp13,77 triliun pada tahun 2025. Hal ini merepresentasikan pertumbuhan nominal sebesar Rp4,28 triliun atau setara dengan kenaikan 45,19%. secara yoy. Peningkatan total pembiayaan tersebut merupakan pencapaian yang sangat ekspansif dan menunjukkan kepercayaan masyarakat terhadap pembiayaan hunian berbasis syariah yang meningkat pesat.

Overall, the growth of Non-Mortgage Financing in 2025 was primarily driven by the increase in Multi-Purpose Financing and the emergence of Gold Installment Financing as a new potential product. However, the decline in Home Construction Financing and Motor Vehicle Financing segments requires further evaluation. More targeted strategies are needed to sustain and optimize growth in flagship products (Multi-Purpose Financing and Gold Installment Financing), while revitalizing or adjusting strategies for underperforming products. With appropriate strategic measures, Non-Mortgage Financing performance is expected to continue growing sustainably in the future.

Subsidized and Non-Subsidized Mortgage Financing (MRF)

Overall, total sharia mortgage (KPR iB) financing demonstrated a very strong positive trend. Total financing increased from IDR9.48 trillion in 2024 to IDR13.77 trillion in 2025, representing a nominal growth of IDR4.28 trillion or an increase of 45.19% year-on-year. This significant growth reflects a highly expansive achievement and indicates increasing public trust in sharia-based housing financing.

Subsidized Mortgage Financing recorded a very significant increase, both in nominal terms and percentage. The value of mortgage financing increased from IDR5.46 trillion in 2024 to IDR9.74 trillion in 2025, representing a nominal growth of IDR4.28 trillion or an increase of 78.26%. This reflects a substantial market expansion and a significant increase in the allocation of government subsidy quotas during the period. Meanwhile, the Non-Subsidized Mortgage segment recorded marginal growth of 0.22%, with a nominal increase of IDR8.79 billion, driven by weakening market demand. On the other hand, branch offices

kini lebih fokus mengoptimalkan realisasi KPR Subsidi. Hal ini merupakan respons atas peningkatan kuota dari pemerintah, serta tingginya permintaan masyarakat dan penawaran rumah dari pihak pengembang.

Namun demikian, akuisisi QRIS merchant mengalami penurunan dari 2.093 merchant pada tahun 2024 menjadi 2.022 merchant pada tahun 2025, atau berkurang 71 merchant (3,39%). However, QRIS merchant acquisition declined from 2,093 merchants in 2024 to 2,022 merchants in 2025, representing a decrease of 71 merchants (3.39%). This indicates that despite growth in users and transactions, there are challenges in merchant acquisition that require further attention.

Kemampuan Membayar Utang Jangka Panjang (Solvabilitas)

Rasio solvabilitas merupakan indikator penting dalam menilai kemampuan Bank dalam memenuhi kewajiban jangka panjang serta menjaga keberlanjutan struktur permodalan. Rasio ini mencerminkan tingkat kecukupan modal, komposisi pendanaan, serta sejauh mana Bank mampu mengelola risiko yang timbul dari penggunaan kewajiban dalam kegiatan operasionalnya. Pengukuran solvabilitas umumnya dilakukan melalui beberapa rasio utama, antara lain seperti *Capital Adequacy Ratio* (CAR), *Debt to Equity Ratio* (DER), dan *Debt to Asset Ratio* (DAR).

in 2024 to 93.43% in 2025, or a decline of 10.75%. This was influenced by Bank BSN strategy to maintain balanced growth in financing and fund raising, while ensuring liquidity is managed in line with the FDR target and maintaining an optimal profit-sharing expense.

Long-Term Debt Servicing Capacity (Solvency)

Solvency ratios are key indicators in assessing the Bank's ability to meet its long-term obligations and maintain a sustainable capital structure. These ratios reflect capital adequacy, funding composition, and the Bank's ability to manage risks arising from the use of liabilities in its operations. Solvency is generally measured using several key ratios, including the *Capital Adequacy Ratio* (CAR), *Debt to Equity Ratio* (DER), and *Debt to Asset Ratio* (DAR).

Tabel Rasio Solvabilitas
Table of Solvency Ratios

(dalam % / in %)

Uraian	2025	2024	Kenaikan/ Penurunan Increase/ Decrease	Description
Capital Adequacy Ratio (CAR)	37,64%	60,13%	(22,49%)	Capital Adequacy Ratio (CAR)

Debt to Asset Ratio (DAR)	1,94%	0,67%	1,27%	Debt to Asset Ratio (DAR)

CAR pada tahun 2025 sebesar 37,64%, menurun dibandingkan tahun 2024 sebesar 60,13%, atau mengalami penurunan 22,49%. Hal yang mendasari penurunan ini adalah adanya kenaikan Aset Tertimbang Menurut Risiko (ATMR) seiring dengan meningkatnya pertumbuhan aset produktif, meskipun di lain sisi total modal baik itu modal inti maupun modal pelengkap Bank mengalami pertumbuhan dampak dari setoran modal maupun kenaikan laba berjalan.

Bank secara aktif mengelola modalnya sesuai dengan peraturan yang berlaku. Tujuan utamanya adalah untuk memastikan bahwa setiap saat Bank dapat menjaga kecukupan modalnya untuk menutup risiko bawaan (*inherent risks*) pada kegiatan perbankan tanpa mengurangi optimalisasi nilai pemegang saham. Penentuan kepatuhan Bank terhadap peraturan dan rasio yang berlaku didasarkan pada peraturan praktik akuntansi yang berbeda dalam beberapa hal dengan Standar Akuntansi Keuangan di Indonesia. rasio KPMM Bank dihitung berdasarkan Peraturan OJK No. 21/POJK.03/2014 tanggal 19 November 2014 yang mencabut peraturan sebelumnya.

DER pada tahun 2025 sebesar 21,75%, meningkat dibandingkan tahun 2024 sebesar 2,03%, atau mengalami kenaikan 19,73%. Peningkatan ini dipengaruhi oleh adanya aksi korporasi pengalihan seluruh aset dan kewajiban yang tercatat pada laporan posisi keuangan UUS BTN kepada Bank BSN.

DAR pada tahun 2025 sebesar 1,94%, meningkat dibandingkan tahun 2024 sebesar 0,67%, atau mengalami kenaikan 1,27%. Kenaikan ini disebabkan oleh adanya aksi korporasi pengalihan seluruh aset dan kewajiban yang tercatat pada laporan posisi keuangan UUS BTN kepada Bank BSN.

Kolektibilitas Piutang

Kolektibilitas piutang merupakan salah satu indikator penting dalam menilai kualitas aset dan efektivitas pengelolaan risiko kredit. Tingkat kolektibilitas ini mencerminkan kemampuan dalam mengelola dan menagih piutang yang diberikan, sehingga dapat meminimalkan potensi kerugian akibat piutang bermasalah. Penilaian kolektibilitas piutang umumnya dilakukan melalui pengukuran rasio *Non-Performing Financing* (NPF), baik secara *gross* maupun *nett*, yang menunjukkan proporsi piutang bermasalah terhadap total piutang yang dimiliki.

The CAR in 2025 was recorded at 37.64%, decreasing from 60.13% in 2024, or by 22.49%. This decline was primarily due to an increase in Risk-Weighted Assets (RWA/ATMR) in line with the growth in earning assets, although total capital, both core and supplementary capital, increased as a result of capital injections and higher current year earnings.

The Bank actively manages its capital in accordance with applicable regulations. The primary objective is to ensure that the Bank consistently maintains sufficient capital to cover inherent risks arising from banking activities, without compromising shareholder value optimization. The determination of compliance with applicable regulations and ratios is based on accounting practices that may differ in certain aspects from Indonesian Financial Accounting Standards. The Bank's Capital Adequacy Ratio (KPMM) is calculated based on OJK Regulation No. 21/POJK.03/2014 dated November 19, 2014, which replaced the previous regulation.

The DER in 2025 was recorded at 21.75%, increasing from 2.03% in 2024, or by 19.73%. This increase was influenced by the corporate action involving the transfer of all assets and liabilities recorded in the statement of financial position of BTN's Sharia Business Unit (UUS) to Bank BSN.

The DAR in 2025 was recorded at 1.94%, increasing from 0.67% in 2024, or by 1.27%. This increase was also driven by the corporate action involving the transfer of all assets and liabilities recorded in the statement of financial position of BTN's Sharia Business Unit (UUS) to Bank BSN.

Receivables Collectibility

Receivables collectibility is a key indicator in assessing asset quality and the effectiveness of credit risk management. This level of collectibility reflects the Bank's ability to manage and collect its receivables, thereby minimizing potential losses from non-performing accounts. Collectibility is generally measured using the *Non-Performing Financing* (NPF) ratio, both on a gross and net basis, which indicates the proportion of problematic receivables relative to total receivables.

Tingkat kolektibilitas piutang pada tahun 2025 menunjukkan dinamika yang berbeda antara rasio NPF Gross dan NPF Nett dibandingkan tahun 2024. Rasio NPF Gross pada tahun 2025 tercatat sebesar 2,58%, meningkat dibandingkan tahun 2024 sebesar 1,58%, atau mengalami kenaikan 1,00%. Peningkatan ini dipengaruhi oleh adanya aksi korporasi yang mengakibatkan adanya konsolidasi atas portfolio pembiayaan, termasuk pembiayaan bermasalah. Di sisi lain, rasio NPF Nett pada tahun 2025 tercatat sebesar 0,70%, menurun dibandingkan tahun 2024 sebesar 1,34%, atau mengalami penurunan 0,64%. Business Prospects and Future Strategies

Taking into account current economic dynamics, in January 2026 the International Monetary Fund (IMF) projected global economic growth for 2026 at 3.3%, followed by a slight moderation to 3.2% in 2027. In 2026, emerging economies such as Indonesia are expected to experience a modest improvement compared to 2025. China's economy is projected to slow down, while advanced economies such as the United States are expected to grow slightly higher than in 2025.

National economic growth remained positive in 2025 amid the global economic slowdown, supported by strong household consumption, increased investment inflows, and sustained export performance. Bank Indonesia projects that economic growth in 2026 will remain solid and expand within the range of 4.9%–5.7%. Inflation in 2026 is expected to remain within Bank Indonesia's target range of 2.5% ±1% yoy. To achieve this target, the Government and Bank Indonesia will implement a mix of fiscal, monetary, and real sector policies. Meanwhile, the average exchange rate of the Rupiah against the US Dollar is expected to remain stable and show a strengthening trend in 2026, while still considering uncertainties in global financial markets, including The Fed's monetary policy, geopolitical dynamics, and the potential for trade tensions. Bank Indonesia's policy rate is expected to decline at a more gradual pace in 2026.

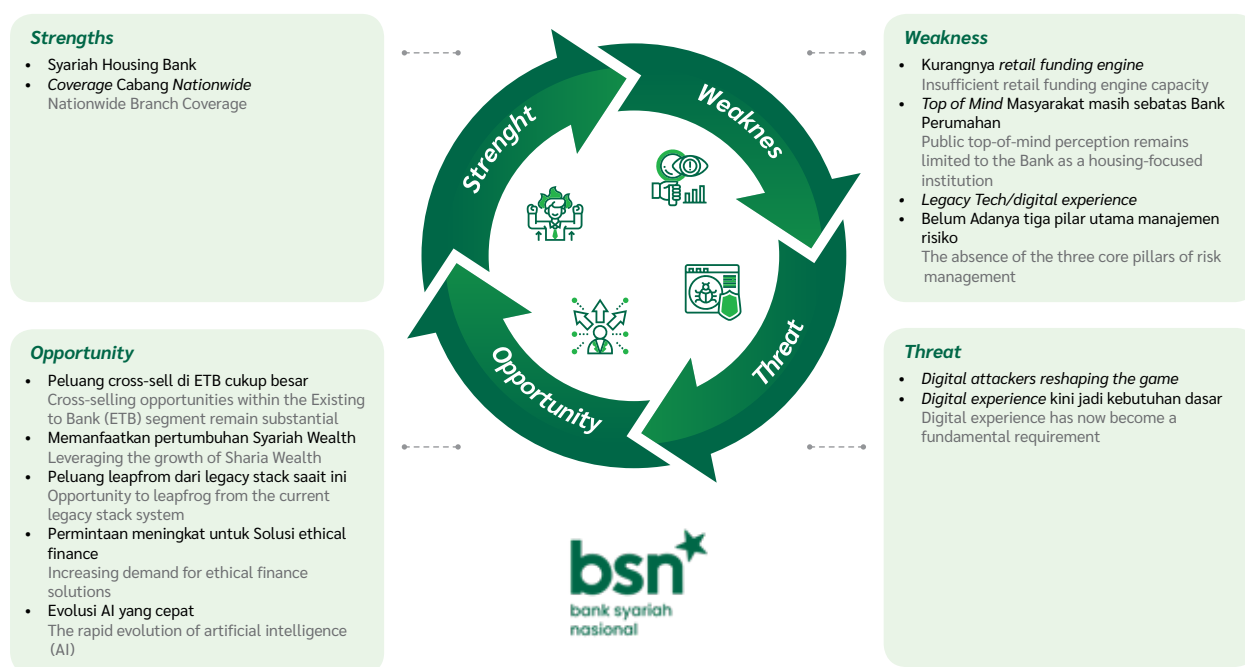

The financial services sector, particularly banking, is projected to maintain solid performance and strengthen compared to 2025. Bank Indonesia estimates that in 2026, Third Party Funds (DPK) will grow in the range of 8.0%–10.0%, while bank lending is projected to grow by 8.0%–12.0%. For the sharia banking

Implementation of Governance in Remuneration for Sharia Commercial Banks

Nomination and Remuneration Committee

Information related to the Nomination and Remuneration Committee can be found in the Committees under the Board of Commissioners section.

Remuneration Policy Formulation Process

As part of the implementation of Good Corporate Governance (GCG), the Company consistently ensures that remuneration policies are developed based on the principles of transparency, accountability, responsibility, independence, and fairness. In 2025, the Company issued a new provision that further enhanced the previous remuneration policy, namely Special Policy (KK) No. 5-B on Remuneration. This policy was established to ensure that the salary and compensation system remains competitive and aligned with developments in the banking industry as well as applicable regulatory requirements.

As part of its human capital management strategy, the remuneration policy is designed to provide fair and competitive rewards to employees based on factors such as performance achievement, position, competency, and labor market conditions. The implementation of this policy aims to enhance motivation, retain top talent, and increase employee productivity to support sustainable business growth.

Kebijakan remunerasi dirancang untuk mendukung tata kelola perusahaan yang baik dengan menerapkan prinsip kesesuaian antara kinerja, risiko, dan penghargaan, sehingga memastikan bahwa kompensasi yang diberikan kepada pegawai tidak mendorong pengambilan risiko yang berlebihan (excessive risk-taking). Hal ini sejalan dengan praktik prudential banking, di mana pengelolaan risiko dilakukan secara terukur guna menjaga kesehatan keuangan dan keberlanjutan usaha Perseroan.

Selain itu, dalam penyusunannya, kebijakan remunerasi mempertimbangkan aspek kewajaran dan daya saing dengan melakukan benchmarking terhadap praktik remunerasi di industri perbankan serta memperhatikan kontribusi pegawai terhadap pencapaian kinerja Perseroan. Melalui kebijakan ini, Perseroan berkomitmen untuk menciptakan lingkungan kerja yang kompetitif dan berdaya saing tinggi, sekaligus tetap mengedepankan kepatuhan terhadap regulasi dan prinsip GCG yang berlaku.

Remunerasi yang dikaitkan dengan kinerja dan risiko di antaranya yaitu bonus atau bentuk lainnya yang dipersamakan dengan itu.

Pengukuran Kinerja Dikaitkan dengan Remunerasi

This is in line with prudential banking practices, where risk management is carried out in a measured manner to maintain financial soundness and business sustainability.

In addition, the policy formulation considers fairness and competitiveness by conducting benchmarking against remuneration practices in the banking industry and taking into account employee contributions to the Company's performance achievements. Through this policy, the Company is committed to creating a competitive and high-performing work environment while maintaining compliance with applicable regulations and GCG principles.

Scope of Remuneration Policy and Its Implementation per Business Unit, Region, and Subsidiaries or Overseas Branch Offices

The Company provides regional allowances for certain areas in accordance with Board of Directors' decisions, as stipulated in Special Policy KK 5-B of 2025 on Remuneration, and implemented accordingly.

In determining risks associated with variable remuneration, the Company takes into account the most significant risks in its business activities as key risks, in accordance with applicable regulatory provisions on risk management implementation for commercial banks. Remuneration linked to performance and risk includes, among others, bonuses or other equivalent forms of incentive compensation.

Sistem Pengendalian Internal

Pengendalian Keuangan dan Operasional

Kegiatan pengendalian melibatkan seluruh pegawai Bank termasuk Direksi. Oleh karena itu, kegiatan pengendalian akan berjalan efektif apabila direncanakan dan diterapkan guna mengendalikan risiko yang telah diidentifikasi. Kegiatan pengendalian yaitu tindakan yang dilakukan dalam suatu proses pengendalian terhadap kegiatan Bank pada setiap tingkat dan unit dalam struktur organisasi mencakup penetapan kebijakan dan prosedur pengendalian seperti penetapan kewenangan, otorisasi, rekonsiliasi, verifikasi, penilaian atas prestasi kerja, pembagian tugas dan pengamanan terhadap aset perusahaan yang merupakan kegiatan tidak terpisahkan dari setiap fungsi atau kegiatan Bank sehari-hari. Kegiatan pengendalian juga harus mencakup tindakan untuk memastikan kepatuhan terhadap prinsip syariah dalam seluruh aktivitas Bank, baik operasional, produk, maupun pelaporan.

Kegiatan pengendalian meliputi kebijakan, prosedur, dan praktik yang memberikan keyakinan pejabat dan pegawai Bank bahwa arahan Direksi telah dilaksanakan secara efektif. Kegiatan pengendalian tersebut akan dapat membantu Direksi dalam mengelola dan mengendalikan risiko yang dapat mempengaruhi kinerja atau mengakibatkan kerugian Bank.

Kegiatan pengendalian diterapkan pada semua tingkatan fungsional sesuai dengan struktur organisasi Bank, yang paling sedikit meliputi:

1. Kaji ulang manajemen (*Top Level Reviews*)
Direksi Bank secara berkala meminta penjelasan (informasi) dan laporan kinerja operasional dari pejabat dan pegawai sehingga memungkinkan untuk mengkaji ulang hasil kemajuan (realisasi) dibandingkan dengan target yang akan dicapai, seperti laporan keuangan dibandingkan dengan rencana anggaran yang ditetapkan. Berdasarkan kaji ulang tersebut, Direksi segera mendeteksi permasalahan seperti kelemahan pengendalian, kesalahan laporan keuangan, atau Fraud. Kaji ulang oleh Direksi juga mempertimbangkan evaluasi dari Dewan Pengawas Syariah atas pelaksanaan operasional yang terkait prinsip syariah.
2. Kaji ulang kinerja operasional (*functional review*)
Kaji ulang yang dilakukan oleh SKAI secara periodik meliputi penilaian Risiko (Laporan Profil Risiko) dari Satuan Kerja Manajemen Risiko, analisis data operasional dengan membandingkan data transaksi terhadap laporan dan kaji ulang terhadap realisasi rencana kerja dan anggaran guna identifikasi penyimpangan signifikan dan tindakan perbaikan.

Pengendalian Sistem Informasi

Bank melakukan verifikasi terhadap akurasi dan kelengkapan dari transaksi dan melaksanakan prosedur otorisasi. Kegiatan pengendalian sistem informasi digolongkan dalam 2 (dua) kriteria yaitu:

Internal Control System

Financial and Operational Control

Control activities involve all Bank employees, including the Board of Directors. Therefore, control activities are effective when they are properly planned and implemented to manage identified risks. Control activities refer to actions carried out within the control process of Bank operations at every level and unit within the organizational structure, including the establishment of policies and control procedures such as authority limits, authorization, reconciliation, verification, performance assessment, segregation of duties, and safeguarding of company assets. These activities are an integral part of the Bank's daily functions. Control activities must also ensure compliance with Sharia principles in all Bank activities, including operations, products, and reporting.

Control activities include policies, procedures, and practices that provide assurance to the Board of Directors and employees that management directives are effectively implemented. These activities assist the Board of Directors in managing and controlling risks that may affect performance or result in losses to the Bank.

Control activities are implemented at all functional levels according to the Bank's organizational structure, including at least:

1. Management Top-Level Review
The Board of Directors periodically requests explanations and operational performance reports from officers and employees, enabling the review of progress against targets, such as financial reports compared to budget plans. Based on this review, the Board of Directors promptly identifies issues such as control weaknesses, financial reporting errors, or fraud. This review also considers evaluations from the Sharia Supervisory Board regarding Sharia compliance in operations.
2. Functional Performance Review
Periodic reviews conducted by SKAI include the assessment of Risk (Risk Profile Report) from the Risk Management Work Unit, analysis of operational data by comparing transaction data against reports, and a review of the realization of the work plan and budget in order to identify significant deviations and determine corrective actions.

Information System Control

The Bank performs verification of transaction accuracy and completeness and applies authorization procedures. Information system control activities are classified into two categories:

1. Pengendalian umum, meliputi pengendalian terhadap operasional pusat data, sistem pengadaan dan pemeliharaan perangkat lunak, pengamanan akses, serta pengembangan dan pemeliharaan sistem aplikasi yang ada. Pengendalian umum ini diterapkan terhadap mainframe, server, dan users workstation, serta jaringan internal-eksternal.
2. Pengendalian aplikasi, diterapkan terhadap program yang digunakan Bank dalam mengolah transaksi dan untuk memastikan bahwa semua transaksi adalah benar, akurat, dan telah diotorisasi secara benar serta sesuai dengan prinsip syariah. Selain itu, pengendalian aplikasi harus dapat memastikan tersedianya proses audit yang efektif dan untuk mengecek kebenaran proses audit dimaksud.

Pengendalian Aset Fisik

Pengendalian aset fisik dilaksanakan untuk menjamin terselenggaranya pengamanan fisik terhadap aset Bank. Kegiatan ini meliputi pengamanan catatan, dan akses terbatas terhadap program komputer dan file data, serta membandingkan nilai aset dan liabilitas Bank dengan nilai yang tercantum pada catatan pengendali, khususnya pengecekan nilai aset secara berkala.

Dokumentasi

Bank paling sedikit harus memformalkan dan mendokumentasikan kebijakan, prosedur, sistem dan standar akuntansi, serta proses audit secara memadai dan perbarui secara berkala guna menggambarkan kegiatan operasional secara actual dan terinformasi kepada pejabat dan pegawai.

Pemisahan Fungsi

Pemisahan fungsi dimaksudkan agar setiap orang dalam jabatannya tidak memiliki peluang untuk melakukan dan menyembunyikan kesalahan atau penyimpangan dalam pelaksanaan tugas pada seluruh jenjang organisasi dan seluruh langkah kegiatan operasional. Bank harus mematuhi prinsip pemisahan fungsi ini, yang dikenal sebagai "*Four Eyes Principle*".

Dalam hal diperlukan karena perubahan karakteristik kegiatan usaha dan transaksi serta organisasi Bank, Direksi Bank harus menetapkan prosedur (kewenangan) termasuk penetapan daftar petugas yang dapat mengakses suatu transaksi atau kegiatan usaha yang berisiko tinggi. Penyesuaian struktur kewenangan tersebut harus mempertimbangkan pemisahan kewenangan antara proses operasional syariah dan fungsi pengawasan kepatuhan syariah, guna menjaga integritas prinsip-prinsip syariah dalam pelaksanaan transaksi.

Sistem Pengendalian Intern yang efektif mensyaratkan adanya pemisahan fungsi dan menghindari pemberian wewenang serta tanggung jawab yang dapat menimbulkan berbagai benturan kepentingan (*conflict of interest*). Seluruh aspek yang dapat menimbulkan pertentangan kepentingan tersebut harus diidentifikasi, diminimalkan, dan dipantau secara hati-hati oleh pihak lain yang independen seperti akuntan publik.

1. General controls, including controls over data center operations, software procurement and maintenance systems, access security, as well as the development and maintenance of existing application systems. These general controls are applied to mainframes, servers, user workstations, and internal-external networks.
2. Application controls, applied to programs used by the Bank in processing transactions to ensure that all transactions are valid, accurate, properly authorized, and compliant with Sharia principles. In addition, application controls must ensure the availability of an effective audit trail and enable verification of audit processes.

Physical Asset Control

Physical asset control is implemented to ensure the proper safeguarding of the Bank's physical assets. These activities include securing records, restricting access to computer programs and data files, as well as comparing the value of the Bank's assets and liabilities with the values recorded in control records, particularly through periodic verification of asset values.

Documentation

The Bank shall, at a minimum, formalize and document policies, procedures, systems and accounting standards, as well as audit processes in an adequate manner, and update them on a periodic basis to reflect actual operational activities and to ensure that such information is properly communicated to officers and employees.

Segregation of Duties

Segregation of duties is intended to ensure that no individual, in their position, has the opportunity to commit and conceal errors or irregularities in performing their duties across all organizational levels and operational processes. The Bank must comply with this principle, known as the "*Four Eyes Principle*".

Where necessary due to changes in business activities, transaction characteristics, and the Bank's organizational structure, the Board of Directors shall establish procedures (authorities), including determining a list of officers authorized to access high-risk transactions or business activities. Such adjustments must consider the separation between Sharia operational functions and Sharia compliance oversight functions to maintain the integrity of Sharia principles in transaction execution.

An effective internal control system requires segregation of duties and the avoidance of assigning authorities and responsibilities that may create conflicts of interest. All potential conflict-of-interest aspects must be identified, minimized, and carefully monitored by independent parties such as public accountants.

Pengendalian atas Kepatuhan Terhadap Peraturan Perundang-Undangan Lainnya

Pengendalian atas kepatuhan terhadap peraturan perundang-undangan dilakukan secara berkelanjutan untuk memastikan seluruh kebijakan, sistem, prosedur, dan kegiatan usaha Bank telah sesuai dengan ketentuan regulator, peraturan yang berlaku, serta prinsip syariah. Divisi Kepatuhan melakukan penerbitan dan pengkinian kebijakan internal melalui evaluasi pedoman, gap analysis, serta analisis dampak atas ketentuan baru regulator terhadap proses bisnis dan operasional Bank. Selain itu, Bank juga melakukan internalisasi ketentuan regulator terbaru serta sharing session dan pelatihan secara berkala guna meningkatkan budaya kepatuhan, risk awareness, dan koordinasi antar unit kerja.

Satuan Kerja Kepatuhan juga memberikan kajian dan review atas kebijakan, sistem, prosedur, serta pengembangan produk dan aktivitas baru untuk memastikan kesesuaiannya dengan ketentuan yang berlaku. Pengawasan kepatuhan diperkuat di Kantor Pusat dan Kantor Cabang, termasuk dalam penerapan prinsip syariah melalui pemeriksaan sharia compliance. Selain itu, fungsi kepatuhan juga berperan sebagai liaison dengan regulator seperti OJK dan BI dalam proses konsultasi dan perizinan produk maupun kegiatan baru agar seluruh pengajuan sesuai dengan ketentuan regulator.

Pengendalian atas Pelaporan Keuangan

Sebagai lembaga keuangan yang memiliki tanggung jawab besar dalam menjaga kepercayaan publik, Bank menyadari pentingnya menyusun dan menerapkan kerangka kerja pengendalian internal atas pelaporan keuangan/Internal Control Over Financial Reporting (ICOFR). Laporan keuangan yang akurat, andal, dan konsisten merupakan pilar utama yang mendukung integritas sistem keuangan serta memberikan keyakinan kepada regulator, investor, deposan, dan masyarakat. Selain itu, laporan keuangan juga menjadi landasan utama dalam proses pengambilan keputusan ekonomi oleh berbagai pemangku kepentingan. Pelaksanaan pengendalian internal atas laporan keuangan mulai dari tahap perancangan, implementasi dan pemantauan berkelanjutan, evaluasi, remediasi, pelaporan, dan asurans oleh Praktisi Eksternal. Direksi, Dewan Komisaris dan DPS masing-masing bertanggung jawab dalam penerapan aktivitas pengendalian internal atas pelaporan keuangan.

Tinjauan atas Efektivitas Sistem Pengendalian Internal

Berdasarkan hasil pemeriksaan yang telah dilaksanakan pada Tahun 2025, Sistem Pengendalian Intern (SPI) secara umum telah diterapkan dengan cukup memadai. Kebijakan, prosedur, serta mekanisme pengendalian yang ada, pada umumnya telah mendukung pencapaian tujuan organisasi, menjaga kepatuhan terhadap ketentuan yang berlaku, serta meminimalkan eksposur risiko yang signifikan.

Controls Over Compliance with Other Laws and Regulations

Controls over compliance with laws and regulations are implemented on an ongoing basis to ensure that all Bank policies, systems, procedures, and business activities are in accordance with applicable regulatory requirements, prevailing regulations, and Sharia principles. The Compliance Division issues and updates internal policies through guideline evaluations, gap analysis, and impact analysis of new regulatory requirements on the Bank's business processes and operations. In addition, the Bank conducts regular internalization of updated regulations, as well as periodic sharing sessions and training to strengthen compliance culture, risk awareness, and coordination among work units.

The Compliance Unit also provides assessments and reviews of policies, systems, procedures, and the development of new products and activities to ensure alignment with applicable regulations. Compliance supervision is strengthened across Head Office and Branch Offices, including the implementation of Sharia principles through Sharia compliance reviews. Furthermore, the compliance function also acts as a liaison with regulators such as OJK and Bank Indonesia in consultation and licensing processes for new products and activities to ensure all submissions comply with regulatory requirements.

Controls Over Financial Reporting

As a financial institution with a high level of public trust responsibility, the Bank recognizes the importance of establishing and implementing an Internal Control over Financial Reporting (ICOFR) framework. Accurate, reliable, and consistent financial statements are a key pillar supporting the integrity of the financial system and providing assurance to regulators, investors, depositors, and the public. Financial statements also serve as the main basis for economic decision-making by stakeholders. The implementation of internal controls over financial reporting covers design, implementation, continuous monitoring, evaluation, remediation, reporting, and assurance by external practitioners. The Board of Directors, Board of Commissioners, and Sharia Supervisory Board (DPS) are each responsible for implementing internal control activities over financial reporting.

Review of Internal Control System Effectiveness

Based on audit results in 2025, the Internal Control System (ICS) has generally been implemented adequately. Existing policies, procedures, and control mechanisms have generally supported the achievement of organizational objectives, ensured regulatory compliance, and minimized significant risk exposure.

Hasil pemeriksaan juga menunjukkan adanya komitmen auditee dalam menerapkan prinsip kehati-hatian, tata kelola yang baik, serta pengelolaan risiko yang berkelanjutan. Hal ini tercermin dari struktur pengendalian yang telah berjalan, pemisahan fungsi yang relatif memadai, serta pelaksanaan pengawasan internal yang dilakukan secara bertahap.

Meskipun demikian, sejalan dengan dinamika operasional dan kebutuhan peningkatan kualitas pengendalian, masih terdapat beberapa aspek yang perlu mendapatkan perhatian auditee. Perbaikan pada aspek tersebut diharapkan dapat semakin memperkuat efektivitas SPI, meningkatkan konsistensi penerapan pengendalian, serta mendukung kinerja dan kepatuhan secara berkelanjutan.

Pernyataan Direksi dan/atau Dewan Komisaris atas Kecukupan Sistem Pengendalian Internal

Sistem Manajemen Risiko

Dalam penerapan Manajemen Risiko, Bank menerapkan 4 (empat) pilar Manajemen Risiko secara efektif sesuai dengan ketentuan Regulator sebagai berikut:

1. Pengawasan aktif Direksi, Dewan Komisaris dan Dewan Pengawas Syariah;
2. Kecukupan kebijakan & prosedur Manajemen Risiko dan penetapan limit;
3. Kecukupan proses identifikasi, pengukuran, pemantauan dan pengendalian Risiko serta Sistem Informasi Manajemen Risiko; dan

Adapun penjelasan terkait 4 (empat) pilar manajemen risiko adalah sebagai berikut:

Pengawasan aktif Direksi, Dewan Komisaris, dan Dewan Pengawas Syariah merupakan salah satu pilar utama dalam penerapan tata kelola perusahaan yang baik pada perbankan. Direksi bertanggung jawab atas menyusun serta melaksanakan kebijakan, strategi, dan kerangka Manajemen Risiko secara tertulis dan komprehensif termasuk limit Risiko secara keseluruhan dan per jenis Risiko,

The audit results also indicate the auditee's commitment to implementing prudential principles, good governance, and sustainable risk management. This is reflected in the existing control structure, relatively adequate segregation of duties, and the implementation of staged internal oversight.

However, in line with operational dynamics and the need to continuously improve control quality, there are still several areas requiring attention. Improvements in these areas are expected to further strengthen the effectiveness of the internal control system, enhance consistency in control implementation, and support sustainable performance and compliance.

Statement of The Board of Directors and/or Board of Commissioners on The Adequacy of The Internal Control System

The Board of Directors and the Board of Commissioners assess that the internal control system of Bank BSN during 2025 has been operating effectively and adequately. Kebijakan Manajemen Risiko bertujuan untuk melindungi dan menciptakan nilai bagi Bank, mencakup namun tidak terbatas pada budaya, proses, dan struktur yang diarahkan untuk memberikan keyakinan yang memadai dalam pencapaian sasaran organisasi dengan mengelola Risiko pada tingkat yang dapat diterima. Risk Management policies are designed and implemented by considering the characteristics and complexity of business activities, Risk Appetite and Risk Tolerance, the Bank's risk profile, compliance with Sharia principles, as well as applicable regulatory requirements and sound banking practices.

The Bank establishes risk limits in accordance with risk appetite, risk tolerance, business strategy alignment, and capital capacity to absorb risk exposure or potential losses, taking into account historical loss experience, human resource capabilities, compliance with applicable external regulations, and adherence to Sharia principles. Risk limits serve as thresholds for determining the intensity of risk mitigation to be implemented by management, and also as a reference for preparing recovery plans in accordance with Financial Services Authority (OJK) regulations and resolution plans in accordance with Indonesia Deposit Insurance Corporation (LPS) requirements, in the event that such limits are exceeded.

Evaluasi secara berkala terhadap kesesuaian asumsi, sumber data, dan prosedur yang digunakan untuk mengukur Risiko. Evaluasi dilakukan paling sedikit secara triwulanan atau sewaktu-waktu yang disesuaikan dengan perkembangan usaha Bank dan kondisi eksternal yang mempengaruhi kondisi Bank secara langsung. *Stress testing* merupakan salah satu jenis uji untuk melengkapi sistem pengukuran Risiko dengan cara mengestimasi potensi kerugian pada kondisi pasar yang tidak normal dengan menggunakan skenario tertentu guna melihat sensitivitas kinerja Bank secara keseluruhan terhadap perubahan faktor Risiko dan mengidentifikasi pengaruh yang berdampak signifikan terhadap portofolio Bank.

Sistem dan prosedur pemantauan Risiko antara lain mencakup pemantauan Risiko terhadap besarnya eksposur Risiko, toleransi Risiko, kepatuhan limit internal, dan hasil *stress testing* maupun konsistensi pelaksanaan dengan kebijakan dan prosedur yang ditetapkan.

Larangan bagi Orang Dalam Perseroan yang mempunyai informasi Orang Dalam untuk melakukan pembelian atau penjualan atas Efek Perseroan didasarkan atas pertimbangan adanya Prinsip Keterbukaan pada Pasar Modal yang berakibat harus terciptanya kesetaraan informasi bagi setiap pihak di dalam mengambil keputusan investasinya. Orang Dalam dari Perseroan yang melakukan transaksi dengan perusahaan lain juga dikenakan larangan untuk melakukan transaksi atas Efek dari perusahaan lain tersebut, meskipun yang bersangkutan bukan Orang Dalam dari perusahaan lain tersebut. Hal ini karena informasi mengenai perusahaan lain tersebut lazimnya diperoleh karena kedudukan Orang Dalam pada bank yang melakukan transaksi dengan perusahaan lain tersebut. Prevention of Insider Trading

As part of managing potential conflicts of interest, the Company has established a policy regarding Insider Trading as regulated in Special Policy No. KK.9-AA of 2023 concerning Investor Relations Activities. 3. Individuals who, due to their position, profession, or business relationship with the Bank, may obtain insider information.
4. Parties who, within the last 6 (six) months, are no longer included in points 1, 2, and 3 above.

The prohibition for Insiders possessing insider information to conduct securities transactions is based on the principle of market transparency, ensuring equal access to information for all parties in making investment decisions. Insiders of the Company who conduct transactions with other companies are also prohibited from trading securities of those companies, even if they are not classified as insiders of those companies. Auditor's responsibilities for the audit of the financial statements

Tujuan kami adalah untuk memperoleh keyakinan memadai tentang apakah laporan keuangan secara keseluruhan bebas dari kesalahan penyajian material, baik yang disebabkan oleh kecurangan maupun kesalahan, dan untuk menerbitkan laporan auditor independen yang mencakup opini kami. Keyakinan memadai merupakan suatu tingkat keyakinan tinggi, namun bukan merupakan suatu jaminan bahwa audit yang dilaksanakan berdasarkan Standar Audit yang ditetapkan oleh IAPI akan selalu mendeteksi kesalahan penyajian material ketika hal tersebut ada. Kesalahan penyajian dapat disebabkan oleh kecurangan maupun kesalahan dan dianggap material jika, baik secara individual maupun agregat, dapat diekspektasikan secara wajar akan mempengaruhi keputusan ekonomi yang diambil oleh pengguna berdasarkan laporan keuangan tersebut.

Our objectives are to obtain reasonable assurance about whether the financial statements taken as a whole are free from material misstatement, whether due to fraud or error, and to issue an independent auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Standards on Auditing established by the IICPA will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Sebagai bagian dari suatu audit berdasarkan Standar Audit yang ditetapkan oleh IAPI, kami menerapkan pertimbangan profesional dan mempertahankan skeptisisme profesional selama audit. Kami juga:

As part of an audit in accordance with Standards on Auditing established by the IICPA, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Mengidentifikasi dan menilai risiko kesalahan penyajian material dalam laporan keuangan, baik yang disebabkan oleh kecurangan maupun kesalahan, mendesain dan melaksanakan prosedur audit yang responsif terhadap risiko tersebut, serta memperoleh bukti audit yang cukup dan tepat untuk menyediakan basis bagi opini kami. Risiko tidak terdeteksinya suatu kesalahan penyajian material yang disebabkan oleh kecurangan lebih tinggi dari yang disebabkan oleh kesalahan, karena kecurangan dapat melibatkan kolusi, pemalsuan, penghilangan secara sengaja, pernyataan salah, atau pengabaian pengendalian internal.

- Memperoleh suatu pemahaman tentang pengendalian internal yang relevan dengan audit untuk mendesain prosedur audit yang tepat sesuai dengan kondisinya, tetapi bukan untuk tujuan menyatakan opini atas keefektifitasan pengendalian internal Bank.
- Mengevaluasi ketepatan kebijakan akuntansi yang digunakan serta kewajaran estimasi akuntansi dan pengungkapan terkait yang dibuat oleh manajemen.
- *Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to such risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.*
- *Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Bank's internal control.*

- Menyimpulkan ketepatan penggunaan basis akuntansi kelangsungan usaha oleh manajemen dan, berdasarkan bukti audit yang diperoleh, apakah terdapat suatu ketidakpastian material yang terkait dengan peristiwa atau kondisi yang dapat menyebabkan keraguan signifikan atas kemampuan Bank untuk mempertahankan kelangsungan usahanya. Ketika kami menyimpulkan bahwa terdapat suatu ketidakpastian material, kami diharuskan untuk menarik perhatian dalam laporan auditor independen kami ke pengungkapan terkait dalam laporan Keuangan atau, jika pengungkapan tersebut tidak memadai, memodifikasi opini kami. Kesimpulan kami didasarkan pada bukti audit yang diperoleh hingga tanggal laporan auditor independen kami. Liabilitas sewa diukur pada nilai kini pembayaran sewa yang belum dibayar pada tanggal permulaan, didiskontokan dengan menggunakan tingkat sewa implisit dalam sewa atau jika tingkat sewa tersebut tidak dapat ditentukan, maka menggunakan tingkat sewa. Pada umumnya, Bank menggunakan sewa sebagai tingkat sewa diskonto.

Pembayaran sewa yang termasuk dalam pengukuran liabilitas sewa meliputi pembayaran berikut ini:

- Pembayaran tetap, termasuk pembayaran tetap secara substansi;
- Pembayaran sewa yang bergantung pada indeks atau tingkat imbalan yang pada awalnya diukur dengan menggunakan indeks atau tingkat imbalan pada tanggal permulaan;
- Jumlah yang diperkirakan akan dibayarkan oleh penyewa dengan jaminan nilai residual;
- Harga eksekusi opsi beli jika Bank cukup pasti untuk mengeksekusi opsi tersebut; dan penalti karena penghentian awal sewa kecuali jika Bank cukup pasti untuk tidak menghentikan lebih awal.

Pembayaran sewa dialokasikan menjadi bagian pokok dan biaya keuangan. Biaya keuangan dibebankan pada laba rugi selama periode sewa sehingga menghasilkan tingkat sewa periodik yang konstan atas saldo liabilitas untuk setiap periode.

Jika sewa mengalihkan kepemilikan aset pendasar kepada Bank pada akhir masa sewa atau jika biaya perolehan aset hak guna merefleksikan Bank akan mengeksekusi opsi beli, maka Bank menyusutkan aset hak-guna dari tanggal permulaan hingga akhir umur manfaat aset pendasar. Jika tidak, maka Bank menyusutkan aset hak guna dari tanggal permulaan hingga tanggal yang lebih awal antara akhir umur manfaat aset hak guna atau akhir masa sewa.

2. SUMMARY OF MATERIAL ACCOUNTING AND FINANCIAL REPORTING POLICIES (continued)

p. Right-of-Use Assets and Lease Liabilities (continued)

As lessee (continued)

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the lease rate implicit in the lease or, if that rate cannot be readily determined, using lease rate. Generally, the Bank uses its lease as the discount lease.

Lease payments included in the measurement of the lease liability comprise the following:

- Fixed payments, including in-substance fixed payments;
- Variable lease payments that depend on an index or a rate, initially measured using the index or rate as at the commencement date;
- Amounts expected to be payable under a residual value guarantee;
- The exercise price under a purchase option that the Bank is reasonably certain to exercise; and penalties for early termination of a lease unless the Bank is reasonably certain not to terminate early.

Each lease payment is allocated between the liability and finance cost. The finance cost is charged to profit or loss over the lease period so as to produce a constant periodic rate of lease on the remaining balance of the liability for each period.

If the lease transfers ownership of the underlying asset to the Bank by the end of the lease term or if the cost of the right of use assets reflects that the Bank will exercise a purchase option, the Bank depreciates the right of use assets from the commencement date to the end of the useful life of the underlying asset. Otherwise, the Bank depreciates the right of use assets from the commencement date to the earlier of the end of the useful life of the right-of-use assets or the end of the lease term.

3. PENGGUNAAN ESTIMASI, PERTIMBANGAN, DAN ASUMSI MANAJEMEN

Dalam penerapan kebijakan akuntansi Bank, seperti yang diungkapkan dalam Catatan 2 pada laporan keuangan, manajemen harus membuat estimasi, pertimbangan, dan asumsi atas nilai tercatat aset dan liabilitas yang tidak tersedia oleh sumber-sumber lain. Estimasi dan asumsi tersebut, berdasarkan pengalaman historis dan faktor lain yang dipertimbangkan relevan.

Manajemen berkeyakinan bahwa pengungkapan berikut telah mencakup ikhtisar estimasi, pertimbangan dan asumsi signifikan yang dibuat oleh manajemen, yang berpengaruh terhadap jumlah-jumlah yang dilaporkan serta pengungkapan dalam laporan keuangan.

Asumsi utama mengenai masa depan dan sumber utama lain dalam mengestimasi ketidakpastian pada tanggal pelaporan yang mempunyai risiko signifikan yang dapat menyebabkan penyesuaian material terhadap nilai tercatat aset dan liabilitas dalam periode berikutnya diungkapkan di bawah ini. Bank mendasarkan asumsi dan estimasi pada parameter yang tersedia saat laporan keuangan disusun. Kondisi yang ada dan asumsi mengenai perkembangan masa depan dapat berubah karena perubahan situasi pasar yang berada di luar kendali Bank. Perubahan tersebut tercermin dalam asumsi ketika keadaan tersebut terjadi.

a. Estimasi Masa Manfaat Aset Tetap

Masa manfaat dari masing-masing aset tetap Bank diestimasi berdasarkan jangka waktu aset tersebut diharapkan tersedia untuk digunakan. Estimasi tersebut didasarkan pada penilaian kolektif berdasarkan bidang usaha yang sama, evaluasi teknis internal dan pengalaman dengan aset sejenis. Dengan demikian, hasil operasi di masa mendatang mungkin dapat berpengaruh secara signifikan oleh perubahan dalam jumlah dan waktu terjadinya biaya karena perubahan yang disebabkan oleh faktor-faktor yang disebutkan di atas. Penurunan estimasi masa manfaat ekonomis setiap aset tetap akan menyebabkan kenaikan beban penyusutan dan penurunan nilai tercatat aset tetap.

3. MANAGEMENT USE OF ESTIMATES, JUDGMENTS, AND ASSUMPTIONS

In the application of the Bank's accounting policies, which are described in Note 2 to the financial statements, management is required to make estimates, judgments, and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and assumptions are based on historical experience and other factors that are considered to be relevant.

Management believes that the following represent a summary of the significant estimates, judgments, and assumptions made that affected certain reported amounts and disclosures in the financial statements.

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial period are disclosed below. The Bank based its assumptions and estimates on parameters available when the financial statements were prepared. Existing circumstances and assumptions about future developments may change due to market changes on circumstances arising beyond the control of the Bank. Such changes are reflected in the assumptions when they occur.

a. Estimated Useful Life of Property and Equipment

The useful life of each of the item of the Bank's property and equipment are estimated based on the period over which the asset is expected to be available for use. Such estimation is based on a collective assessment of similar business, internal technical evaluation and experience with similar assets. The estimated useful life of each asset is reviewed periodically and updated if expectations differ from previous estimates due to physical wear and tear, technical or commercial obsolescence, and legal or other limits on the use of the asset. It is possible, however, that future results of operations could be materially affected by changes in the amounts and timing of recorded expenses brought about by changes in the factors mentioned above. A reduction in the estimated useful life of any item of property and equipment would increase the recorded depreciation and decrease the carrying values of these assets.

3. PENGGUNAAN ESTIMASI, PERTIMBANGAN, DAN ASUMSI MANAJEMEN (lanjutan)

b. Penurunan Nilai Aset Non-Keuangan

Penelaahan atas penurunan nilai dilakukan apabila terdapat indikasi penurunan nilai aset tertentu. Penentuan nilai wajar aset membutuhkan estimasi arus kas yang diharapkan akan dihasilkan dari pemakaian berkelanjutan dan pelepasan akhir atas aset tersebut. Perubahan signifikan dalam asumsi-asumsi yang digunakan untuk menentukan nilai wajar dapat berdampak signifikan pada nilai terpulihkan dan jumlah kerugian penurunan nilai yang terjadi mungkin berdampak material pada hasil operasi Bank.

c. Imbalan Kerja Jangka Panjang

Penentuan liabilitas imbalan kerja jangka panjang dipengaruhi oleh asumsi tertentu yang digunakan oleh aktuaris dalam menghitung jumlah tersebut. Asumsi-asumsi tersebut dijelaskan dalam Catatan 44 dan mencakup, antara lain, tingkat kenaikan gaji, dan tingkat diskonto yang ditentukan dengan mengacu pada imbal hasil pasar atas bunga obligasi korporasi berkualitas tinggi dalam mata uang yang sama dengan mata uang pembayaran imbalan dan memiliki jangka waktu yang mendekati estimasi jangka waktu liabilitas imbalan kerja jangka panjang tersebut. Hasil aktual yang berbeda dengan asumsi Bank dibukukan pada penghasilan komprehensif lain dan dengan demikian, berdampak pada jumlah penghasilan komprehensif lain yang diakui dan liabilitas yang tercatat pada periode-periode mendatang. Manajemen berkeyakinan bahwa asumsi-asumsi yang digunakan adalah tepat dan wajar, namun demikian, perbedaan signifikan pada hasil aktual, atau perubahan signifikan dalam asumsi-asumsi tersebut dapat berdampak signifikan pada jumlah liabilitas imbalan kerja jangka panjang.

d. Aset Pajak Tangguhan

Aset pajak tangguhan diakui untuk semua perbedaan temporer antara nilai tercatat aset dan liabilitas pada laporan keuangan dengan dasar pengenaan pajak jika kemungkinan besar jumlah laba kena pajak akan memadai untuk pemanfaatan perbedaan temporer yang diakui. Estimasi manajemen yang signifikan diperlukan untuk menentukan jumlah aset pajak tangguhan yang diakui berdasarkan kemungkinan waktu terealisasinya dan jumlah laba kena pajak pada masa mendatang serta strategi perencanaan pajak masa depan.

3. MANAGEMENT USE OF ESTIMATES, JUDGMENTS, AND ASSUMPTIONS (continued)

b. Impairment of Non-Financial Assets

Impairment review is performed when certain impairment indicators are present. Determining the fair value of assets requires the estimation of cash flows expected to be generated from the continued use and ultimate disposition of such assets. Any significant changes in the assumptions used in determining the fair value may materially affect the assessment of recoverable values and any resulting impairment loss could have a material impact on results of the Bank's operations.

c. Long-term Employee Benefits

The determination of the long-term employee benefits is dependent on the selection of certain assumptions used by actuary in calculating such amounts. Those assumptions are described in Note 44 and include, among others, rate of salary increase, and discount rate which is determined after giving consideration to interest rates of high-quality corporate bonds that are denominated in the currency in which the benefits are to be paid and have terms of maturity approximating the terms of the related employee benefits liability. Actual results that differ from the Bank's assumptions are charged to comprehensive income and therefore, generally affect the recognized comprehensive income and recorded obligation in such future periods. While it is believed that the management's assumptions are appropriate and reasonable, significant differences in actual experience or significant changes in assumptions may materially affect the amount of long-term employee benefits liability.

d. Deferred Tax Assets

Deferred tax assets are recognized for all temporary differences between the financial statements' carrying amounts of existing assets and liabilities and their respective taxes bases to the extent that it is probable that taxable profit will be available against which the temporary differences can be utilized. Significant management estimates are required to determine the amount of deferred tax assets that can be recognized, based upon the likely timing and the level of future taxable profits together with future tax planning strategies.

3. PENGGUNAAN ESTIMASI, PERTIMBANGAN, DAN ASUMSI MANAJEMEN (lanjutan)

e. Cadangan Kerugian Penurunan Nilai

Bank menelaah kualitas aset pada setiap tanggal laporan posisi keuangan untuk menilai apakah penurunan nilai harus dicatat dalam laporan laba rugi dan penghasilan komprehensif lain. Dalam menentukan apakah penurunan nilai harus dibentuk dalam laporan laba rugi, Bank membuat estimasi penilaian apakah terdapat indikasi penurunan kualitas aset. Estimasi tersebut didasarkan pada asumsi dari sejumlah aset dan hasil akhirnya mungkin berbeda, yang mengakibatkan perubahan di masa mendatang atas cadangan penurunan nilai.

Kondisi spesifik *counterparty* yang mengalami penurunan nilai dalam pembentukan cadangan kerugian atas piutang, pinjaman *qardh*, dan pembiayaan dievaluasi secara individu berdasarkan estimasi terbaik manajemen atas nilai kini arus kas yang diharapkan akan diterima. Dalam mengestimasi arus kas tersebut, manajemen membuat pertimbangan tentang situasi keuangan *counterparty* dan/atau nilai realisasi bersih dari setiap agunan. Setiap aset yang mengalami penurunan nilai dinilai sesuai dengan manfaat yang ada, dan strategi penyelesaian serta estimasi arus kas yang diperkirakan dapat diterima.

Perhitungan cadangan penurunan nilai kolektif meliputi kerugian pembiayaan yang melekat dalam portofolio piutang, pinjaman *qardh*, dan pembiayaan dengan karakteristik ekonomi yang sama ketika terdapat bukti objektif penurunan nilai, tetapi penurunan nilai secara individu belum dapat diidentifikasi. Dalam menilai kebutuhan untuk cadangan kolektif, manajemen mempertimbangkan faktor-faktor seperti kualitas piutang dan segmentasi. Guna membuat estimasi cadangan yang diperlukan, manajemen membuat asumsi untuk menentukan kerugian yang melekat, dan untuk menentukan parameter input yang diperlukan, berdasarkan pengalaman masa lalu dan kondisi ekonomi saat ini. Keakuratan penyisihan tergantung pada seberapa baik estimasi arus kas masa depan untuk cadangan *counterparty* tertentu dan asumsi model dan parameter yang digunakan dalam menentukan cadangan kolektif.

3. MANAGEMENT USE OF ESTIMATES, JUDGMENTS, AND ASSUMPTIONS (continued)

e. Allowance for Impairment Losses

The Bank examines the quality of assets at statements of financial position date to assess whether impairment should be recorded in the statements of profit or loss and other comprehensive income. In determining whether a provision for impairment losses should be recognised in the profit or loss, the Bank makes estimation of whether there is any indication of impairment in the asset quality. Such estimates are based on the assumption of a number of factors, and the end result may differ, resulting in future changes to allowance for impairment.

The specific condition of impaired counterparty in calculating allowances for impairment losses on receivables, funds of *qardh*, and financing is evaluated individually based on management's best estimate of the present value of the expected cash in flows. In estimating these cash flows, management makes judgments about the counterparty's financial situation and/or the net realisable value of any underlying collateral. Each impaired assets is assessed on its merits, the workout strategy and estimated recoverable cash flows.

Collectively assessed impairment allowances cover financing losses inherent in portfolios of receivables, funds of *qardh*, and financing with similar economic characteristics when there is objective evidence of impairment, yet the individual impaired items cannot be identified. In assessing the need for collective allowances, management considers factors such as financing quality and product segmentation. In order to estimate the required allowance, assumptions are made to define the way inherent losses are modelled and to determine the required input parameters, based on historical experience and current economic conditions. The accuracy of the allowances depends on how well these estimate future cash flows for specific counterparty allowances and the model assumptions and parameters used in determining collective allowances.

This disbursement of facility is carried out during the *availability period* until December 31, 2025. The outstanding balance as of December 31, 2025 is amounting to Rp2,324,669 with a profit sharing ratio of 22.25%, which is calculated from profit sharing income offered for financing facilities drawn during *availability period* or an equivalent of 4.45% per annum for a maximum period of 20 (twenty) years. In connection with this matter, the agreement will be amended through the execution of an addendum, which is scheduled to be signed in April 2026.

49. MANAJEMEN RISIKO (lanjutan)

Risiko Kredit

Risiko Kredit adalah risiko kerugian yang timbul akibat kegagalan pihak lain dalam memenuhi kewajibannya. Risiko ini dapat muncul dari beberapa faktor, di antaranya: kegagalan nasabah dalam melunasi hutangnya, konsentrasi penyediaan dana (*concentration risk*), kegagalan pihak lawan dalam memenuhi kewajibannya (*counterparty credit risk*), kegagalan dalam proses settlement (*settlement risk*), dan risiko kredit yang berkaitan dengan faktor-faktor negara tertentu (*country risk*).

Risiko Kredit dapat bersumber dari berbagai aktivitas bisnis Bank. Pemberian pembiayaan merupakan sumber Risiko Kredit yang terbesar. Selain pembiayaan, Bank menghadapi Risiko Kredit dari berbagai instrumen keuangan seperti surat berharga, transaksi antar Bank, serta kewajiban komitmen dan kontinjensi.

Sebagai bagian dari pengelolaan Risiko Kredit, Bank secara teratur meninjau dan memperbarui Pedoman Kebijakan Pembiayaan untuk pembiayaan sebagai bagian dari proses penilaian risiko. Eksposur risiko kredit dipantau sejak proses pemberian pembiayaan sampai dengan jatuh tempo. Pemantauan dan pengendalian Risiko Kredit di antaranya dengan mengevaluasi eksposur risiko kredit terhadap limit risiko kredit (*Risk Appetite and Risk Tolerance*).

Pengelolaan pembiayaan Bank diarahkan untuk melakukan ekspansi pembiayaan dan mengelola kualitas setiap pembiayaan sejak saat diberikan sampai dengan dilunasi oleh nasabah dan untuk mencegah pembiayaan tersebut menjadi pembiayaan bermasalah (*Non Performing Financing/NPF*). Pengelolaan kredit yang efektif dapat meminimalkan kerugian dan mengoptimalkan penggunaan modal yang dialokasikan untuk risiko kredit.

Pada pembiayaan konsumen, proses pengendalian Risiko Kredit dilakukan melalui sistem Pengelolaan debitur kredit konsumen Kol-2 dan NPF dilakukan oleh Satuan Kerja *Consumer Collection, Recovery & Asset Sales*.

49. RISK MANAGEMENT (continued)

Credit Risk

Credit Risk is the risk of loss arising from the failure of another party to fulfill its obligations. This risk can arise from several factors, including: the failure of a customer to repay their debt, concentration of funding (concentration risk), failure of a counterparty to meet its obligations (counterparty credit risk), failure in the settlement process (settlement risk), and credit risk associated with specific country factors (country risk).

Credit Risk can arise from various business activities of the Bank. Lending represents the largest source of Credit Risk. Besides loans, the Bank encounters Credit Risk from various financial instruments such as securities, interbank transactions, as well as commitment and contingency obligations.

As part of Credit Risk management, the Bank regularly reviews and updates the Financing Policy Guidelines for financing as part of the risk assessment process. Credit Risk Exposure is monitored from the issuance of credit through to its maturity. Credit Risk monitoring and control involve assessing Credit Risk exposure relative to Credit Risk limits (Risk Appetite and Risk Tolerance).

The Bank's financing management is aimed to support the financing expansion and to manage the quality of each financing from the time the financing was granted until the financing is fully repaid by the customers and to prevent the loan becoming a Non-Performing Financing (NPF). Effective financing management is intended to minimize the risk of losses and optimize the use of capital allocated for credit risk.

In consumer financing, credit risk management is carried out through system. The management of retail customers classified as Kol-2 and NPF is handled by the Consumer Collection, Recovery & Asset Sales.

49. MANAJEMEN RISIKO (lanjutan)

Risiko Kredit (lanjutan)

Dalam penerapan manajemen risiko melalui pengawasan aktif Dewan Komisaris, Direksi dan Dewan Pengawas Syariah untuk Risiko Kredit, Bank juga menerapkan beberapa hal dalam tiap aspek pengawasan tersebut, sebagai berikut:

1. Dewan Komisaris memantau penyediaan dana termasuk meninjau penyediaan dana dengan jumlah besar atau yang diberikan kepada pihak berelasi.
2. Direksi bertanggung jawab agar seluruh aktivitas penyediaan dana dilakukan sesuai dengan strategi dan kebijakan Risiko Kredit yang disetujui oleh Dewan Komisaris.
3. Dewan Pengawas Syariah melakukan evaluasi atas kebijakan manajemen Risiko Kredit yang terkait dengan pemenuhan Prinsip Syariah.
4. Komite Pembiayaan Pusat bertanggung jawab untuk memutuskan pemberian pembiayaan dalam jumlah tertentu sesuai kebijakan Bank.

Peningkatan permintaan pembiayaan yang direstrukturisasi akan meningkatkan risiko kredit, karena pada saat selesainya masa relaksasi di bulan Maret 2022, kemungkinan nasabah belum dapat memenuhi kewajibannya sehingga presentasi risiko kredit meningkat.

Bank tetap harus mengambil sikap waspada profesional dengan memegang teguh prinsip kehati-hatian dengan memperkuat dan mengantisipasi *risk profile* dengan baik, azas *good corporate governance*, profitabilitas dan permodalan bank agar selalu terjaga dengan terus membentuk cadangan kerugian penurunan nilai untuk memperkuat daya tahan terhadap setiap *turbulence* (guncangan) ekonomi.

- (i) Analisa eksposur maksimum terhadap Risiko Kredit setelah memperhitungkan dampak agunan dan mitigasi Risiko Kredit lainnya:

Nilai tercatat dari aset keuangan Bank selain pembiayaan yang diberikan menggambarkan eksposur maksimum atas Risiko Kredit.

Bank menetapkan jenis dan nilai agunan yang dijaminan sesuai skema pembiayaan dan perkiraan tingkat Risiko Kredit dari *counterparty* sebagai *second way out* yang ditetapkan. Jenis dari agunan terdiri dari:

- a) *Physical collateral*, berupa tanah dan bangunan.

49. RISK MANAGEMENT (continued)

Credit Risk (continued)

In implementing risk management through active supervision of Board of Commissioner, Board of Directors, and Sharia Supervisory Board for Credit Risk, the Bank also implements several points in each of the supervising aspect as follows:

1. *The Board of Commissioner monitors fund provided, including a review of fund provided in large amount or those given to related parties.*
2. *The Board of Directors is responsible in ensuring all fund providing activities are conducted according to the Credit Risk strategy and policies approved by the Board of Commissioner.*
3. *The Sharia Supervisory Board evaluates Credit Risk management policies related to compliance with sharia principles.*
4. *The Head Office Financing Committee is responsible for deciding the approval of financing in certain amount according to the Bank's policy.*

The increase in demand for restructured financing will increase credit risk, because by the time the relaxation period is over in March 2022, it is possible that customers will not be able to fulfill their obligations so that the percentage of credit risk increases.

Banks still have to take a professional vigilant attitude by upholding the principle of prudence by strengthening and anticipating a risk profile properly, principles of good corporate governance, profitability and bank capital so that they are always maintained by continuing to form allowance for impairment losses to strengthen resilience against any economic turbulence.

- (i) *Analysis on maximum exposures against Credit Risks considering the impact of collateral and other credit risks mitigation:*

The carrying value of the Bank's financial assets other than financing represents its maximum exposure to Credit Risk.

The Bank determined the type and value of collateral according to the financing scheme as well as estimated Credit Risk level from the counterparty as a determined second way out. The types of collateral are as follows:

- a) *Physical collateral, such as land and buildings.*

Risiko Kredit (lanjutan)

- (i) Analisa eksposur maksimum terhadap Risiko Kredit setelah memperhitungkan dampak agunan dan mitigasi Risiko Kredit lainnya: (lanjutan)

Jenis dari agunan terdiri dari: (lanjutan)

- b) *Financial collateral*, berupa simpanan (tabungan, giro, dan deposito), surat berharga, dan lain-lain.
- c) Lainnya berupa garansi, lembaga penjamin, dan lain-lain.

Pemberian piutang/pembiayaan yang dilaksanakan oleh Bank diatur dalam kebijakan dan prosedur dimana untuk setiap jenis atau skema piutang/pembiayaan telah ditentukan agunan minimal yang harus dipenuhi.

Untuk segmen pembiayaan komersial, sesuai ketentuan perkreditan wajib dijamin oleh agunan yang memadai. Agunan dapat berupa *physical collateral*, *financial collateral* atau lainnya berupa tagihan usaha atau garansi. Untuk seluruh agunan khususnya *physical collateral* akan dilakukan retaksasi dimana nilai likuidasi atas agunan tersebut yang akan dipergunakan dalam menentukan kecukupan nilai agunan (*coverage ratio*).

Selain aspek agunan untuk meminimalkan Risiko Kredit, pemberian piutang/pembiayaan oleh Bank selalu dilakukan berdasarkan evaluasi dan analisa kelayakan sehingga kemampuan pengembalian piutang/pembiayaan (*first way out*) dapat dipastikan.

Adanya keharusan bagi nasabah untuk memenuhi agunan yang dipersyaratkan, evaluasi atas kelayakan piutang/pembiayaan, pengikatan piutang/pembiayaan secara legal dan prosedur *pre-screening* akan menurunkan eksposur Risiko Kredit Bank ke tingkat yang layak dan dapat diterima.

49. RISK MANAGEMENT (continued)

Credit Risk (continued)

- (i) Analysis on maximum exposures against Credit Risks considering the impact of collateral and other credit risks mitigation: (continued)

The types of collateral are as follows: (continued)

- b) *Financial collateral*, such as third party funds (saving deposits, demand deposits, and time deposits), securities, etc.
- c) Others, such as guarantees, guarantee institution, etc.

The receivable/financing granting conducted by the Bank is stipulated in the loan policy and procedure in which every receivable/financing type or scheme has minimum determinable collaterals that should be fulfilled.

For commercial financing segment, according to the financing policy has to be collateralized adequately. The collaterals can be physical collateral, financial collateral or others such as accounts receivable or guarantees. All collaterals particularly for physical collateral will be assessed in which the collateral's liquidation value will be used in determining the coverage ratio.

In addition to collateral aspect to minimize Credit Risk, the Bank consistently grants receivable/financing based on evaluation and feasibility analysis to ensure the customer's repayment capability (*first way out*).

The necessity for customers to comply with collaterals requirement, receivable/financing feasibility evaluation, notarial agreement and pre-screening procedures will decrease the Bank's Credit Risk exposure to the acceptable level.

49. MANAJEMEN RISIKO (lanjutan)

Risiko Likuiditas

Risiko Likuiditas merupakan risiko akibat ketidakmampuan Bank untuk memenuhi kewajiban yang jatuh tempo dari sumber pendanaan arus kas dan/atau dari aset likuid berkualitas tinggi yang dapat diagunkan, tanpa mengganggu aktivitas dan kondisi keuangan Bank. Ketidakmampuan memperoleh sumber pendanaan arus kas sehingga menimbulkan risiko likuiditas dapat disebabkan antara lain oleh:

- a. Ketidakmampuan menghasilkan arus kas yang berasal dari aset produktif maupun yang berasal dari penjualan aset termasuk aset likuid; dan/atau
- b. Ketidakmampuan menghasilkan arus kas yang berasal dari penghimpunan dana, transaksi antar Bank, dan pinjaman yang diterima.

Secara umum, tujuan utama manajemen risiko untuk risiko likuiditas adalah untuk meminimalkan kemungkinan ketidakmampuan Bank dalam memperoleh sumber pendanaan arus kas. Dengan demikian Bank dapat memenuhi setiap kewajiban finansial yang sudah diperjanjikan secara tepat waktu, dan agar senantiasa dapat memelihara tingkat likuiditas yang memadai dan optimal. Kebijakan pengelolaan risiko likuiditas antara lain mencakup pengawasan aktif Dewan Komisaris dan Direksi, yang pada intinya mengatur penerapan Manajemen Risiko likuiditas pada Bank, Kebijakan, Prosedur dan Penetapan Limit yang secara umum mencakup strategi manajemen risiko likuiditas, tingkat risiko yang akan diambil (*risk appetite*) dan toleransi risiko (*risk tolerance*) dan Sistem Informasi Manajemen Risiko serta Sistem Pengendalian Internal dengan menerapkan pengendalian internal dan kaji ulang independen yang memadai terhadap penerapan Manajemen Risiko untuk Risiko likuiditas yang dilaksanakan oleh *Internal Audit Division* (IAD) dan *Enterprise Risk Management* (ERM).

Pengendalian risiko likuiditas melalui strategi pendanaan, pengelolaan posisi likuiditas dan pemantauan risiko likuiditas harian, pengelolaan aset likuid yang berkualitas tinggi, dan rencana pendanaan darurat serta penerapan sistem informasi manajemen risiko secara wajar untuk mendukung pelaksanaan proses identifikasi, pengukuran, pemantauan, dan pengendalian, serta pelaporan risiko likuiditas dalam kondisi normal dan kondisi krisis secara lengkap, akurat, terkini dan berkesinambungan.

49. RISK MANAGEMENT (continued)

Liquidity Risk

Liquidity risk is the risk arising from the inability of the Bank to meet the maturing obligations from cash flow funding sources and/or from high-quality liquid assets that can be pledged, without disturbing the activities and financial condition of the Bank. The inability to obtain funding for cash flows resulting to liquidity risk can be contributed, among others, by:

- a. Inability to generate cash flows from productive assets as well as from the sale of assets, including liquid assets; and/or*
- b. Inability to generate cash flows from funding, inter-bank transactions and fund borrowings.*

In general, the main objective of risk management for liquidity risk is to minimize the possibility of the Bank's inability to obtain source of cash flow funding. Thus, the Bank can meet some financial obligations that have been agreed upon in a timely manner, and to always be able to maintain adequate and optimal levels of liquidity. Liquidity risk management policies include the active supervision of the Board Of Commissioners and Board Of Directors who basically set the implementation of the Bank's liquidity risk management, policy, procedures and determination of limits, which generally includes the liquidity risk management strategy, level of risk to be taken (risk appetite) and risk tolerance, and risk management process, information systems and internal control systems by implementing internal controls and adequate independent review of the risk management implementation for liquidity risk which are being carried out by the Management and conducted by the Internal Audit Division (IAD) and Enterprise Risk Management (ERM).

Liquidity risk management is being carried out through funding strategy, liquidity positions and monitoring of daily liquidity, management of high quality liquid assets, planning the emergency funding as well as implementation of a sound risk management information system to support the process of identification, measurement, monitoring and control, as well as reporting of liquidity risk under normal and extreme conditions in a comprehensive, accurate, timely and sustainable manner.

49. MANAJEMEN RISIKO (lanjutan)

Risiko Pasar (lanjutan)

Sesuai Surat Edaran Otoritas Jasa Keuangan No.12/SEOJK.03/2018 tanggal 21 Agustus 2018 tentang Penerapan Manajemen Risiko dan Pengukuran Risiko Pendekatan Standar, Bank menggunakan perhitungan *Standardized Method* yang digunakan untuk menghitung Kewajiban Penyediaan Modal Minimum (KPMM) untuk risiko pasar. Risiko nilai tukar yang timbul dari fluktuasi nilai tukar dikelola dengan cara menjaga Posisi Devisa Neto sesuai dengan peraturan Bank Indonesia. Gejolak eksternal juga diakomodasi dengan dilakukan *stress testing* untuk melihat sejauh mana Bank dapat bertahan dengan beberapa skenario perubahan kondisi eksternal, khususnya perubahan suku bunga pasar.

Termasuk di dalam risiko pasar adalah risiko perubahan harga instrumen keuangan akibat perubahan faktor-faktor pasar, seperti perubahan suku bunga dan perubahan nilai tukar.

i. Risiko tingkat suku bunga

Risiko tingkat bunga timbul dari adanya kemungkinan bahwa perubahan tingkat suku bunga akan mempengaruhi arus kas di masa yang akan datang dari nilai wajar instrumen keuangan.

Tabel di bawah ini mengikhtisarkan eksposur Bank terhadap risiko tingkat suku bunga (*gross*):

49. RISK MANAGEMENT (continued)

Market Risk (continued)

In accordance with the Financial Services Authority Circular No.12/SEOJK.03/2018 dated in August 21, 2018 regarding the Implementation of Risk Management and Measurement of Risk in the Standard Approach In measuring market risk, the Bank uses the Standardized Method in calculating minimum Capital Adequacy Ratio (CAR) for market risk. Exchange rate risk arises from fluctuations in exchange rates maintained by keeping the net open position in accordance with Bank Indonesia regulations. External shocks are also being considered by stress testing, which is done to measure the extent to which the Bank can survive some scenario changes in external conditions, particularly changes in market interest rates.

Market risk includes the risk of price changes of financial instruments due to changes in market factors, such as changes in interest rates and exchange rates.

i. Interest rate risk

Interest rate risks arise from the possibility that changes in interest rates will affect future cash flows from the fair values of financial instruments.

The tables below summarize the Bank's exposure to interest rate risk (*gross*):

*) Consists of third party receivables.

Risiko Kepatuhan merupakan risiko yang timbul akibat Bank tidak mematuhi dan/atau tidak melaksanakan peraturan perundang-undangan dan ketentuan yang berlaku. Dalam mengidentifikasi risiko kepatuhan, *Compliance Management & Governance* (CMG) melakukan kajian terkait dengan eksposur Risiko Kepatuhan terhadap ketentuan eksternal yang melekat pada ketentuan internal. Di samping itu, CMG menganalisis kejadian yang menyebabkan timbulnya risiko kepatuhan dan menginformasikan hal tersebut ke ERM dan KMR untuk direviu.

Dalam rangka meminimalkan timbulnya Risiko Kepatuhan, *Compliance Management & Governance* (CMG) telah menyediakan portal khusus yang bernama *Compliance Regulatory Management System* (CRMS) untuk memudahkan seluruh unit bisnis melakukan akses terhadap ketentuan Regulator. Besarnya risiko kepatuhan diestimasi berdasarkan kemampuan Bank untuk memenuhi seluruh peraturan pada waktu yang lampau dan yang akan datang. Kegiatan-kegiatan ini termasuk mereviu semua penalti, litigasi, dan keluhan yang pernah diterima Bank.

Dalam pemantauan risiko kepatuhan, DORD dan CMG bertugas untuk mengevaluasi efektivitas implementasi manajemen risiko dengan memantau secara berkala seluruh jenis kegiatan yang berpotensi menimbulkan risiko kepatuhan.
